WASHINGTON, JANUARY, 1811

[NO. 1

LIBERRIA

SSHEDATE NO THE OUT OF PROJURING ANNUAL MEETING OF THE SOCIETY.

A Volumes of the reason power I to introduce continuous into Airca by free labor, which is a solution in system of into the confidential one-unless continuous interest and X_{ij} are X_{ij} and X_{ij} and X_{ij} and X_{ij} and X_{ij} are X_{ij} and X_{ij} and X_{ij} and X_{ij} and X_{ij} and X_{ij} and X_{ij} are X_{ij} and X_{ij} and X_{ij} and X_{ij} are X_{ij} and X_{ij} and X_{ij} and X_{ij} are X_{ij} and X_{ij} and X_{ij} and

It is a little more the two centuring sines a small and feeble company of an grams embarked from Europa for the new western world. Impellably persecution and the love of political and religious liberty, they certally encountered to perils of the sea and the wilderness, to found apon these shorts a free and Christian commonwealth. How wast and cooling at the consequences, as now seen, and more as now anticipated. Canad deby that Providence that combucted Issael to the promised land, they not by entire deviction, overcame to tracks and opposition, tamed with was there, sail do down was ranged and unyachding in nature, organical good government, exacted past and salutary laws, established other non, buth towns and or as deficit of toemselves and their works to Hun, when the delighted to honor by temples, but whose throne they know was Herrou, who a footstoot with, who determines the times will babit tions of all men, and rule with, brother authority the universe.

These, our Prigrim indiers, engaged as an energiese comparatively new, with little cases, as mean from Government, and small experience, with insignificant means at denote, and, is not tapped to us, very income case and limited naturators to come are and visital nation, description to in existence, an outer of sevention building of free

men, united, prosperous, and mercusin with unprecedented rapidity, cives its appending test mony to their counge, constancy, sagacity, and wisdom. Then energy has redeemed a confiner throm a savage state, made it since with the matter than a savage state, and its mealenful of resource, and stream to commence with its mealenful of resource, and stream to commence of every well organized commence, and stream to constant endency of every well organized commences to collect a some endency of every matter has confined in which no impossible line.

The colony of Libertin is as a convenience of and well-governed State, of free eclop benegating and 10 and on as from the United States, establish I under the displaces of a bin yound society, on the western coast of Algeria. Tracins entizons are the descendants from the uncivilized of that country, brong at foreight as slaves into this, where some have enposed the pernal advantages of recedon for years, and others instruction in the arts and customs of cultivated and Clarette ascenty, though in slavery , and all felt the general naturences which surround ment of every class and condition in these United States. Not a few of those born free in this country had well improved their execumstances, and acquired a respectable common relations, will many of the slaves, liberated for emigration, had been trained and disordined by Lumbaic and progs masters, in preparation for their dates in their new home of liberty. Those who had not empoved freedom had seen its beautiful to others, and those who had possessed its even in commest and if it along of its privileges, had experionced them sufficiently to knew their value and so k for a country where they could be fully their . As a people, they may have been less elevated and licetually, perings morally, then our tathers, yet they conmence their great work in an age of interligence and improvement far superior to that in which they had. How yet the contribution made during the last two centuries to the reliseres of human knowledge and experience. The great and an describe experiment of American Colomization and American Life twiare before the eyes of the Liberians, all the motives which urged the first colonists of America to great actio, a should move them, and they are entored and annealed by Engliter hores. In there be relatively aid sidy at ge to the Taboreas- in the observers and past condition of the rance, is it not more than compensated by the examples presented, the aids profited, in weekley his brances made by men since the colonization of American in a range the sets, government, and all the departments of has wholes " solution be animaed " said Mr. Wilbertiere, abused Josephanes ago, when the Africans, without the advantages to be derived from the intercence with polished mitions. have made greater ally account towards of finate a their, peakage, any other pacivilized people on early?" and we may old that their descendants with in to down at the contract of the party and mich

estably risen, as rapidly is any class of inthe starting from the same point, in similar encumstances. Nor should it be to gotten that in the on the of the contributions, and the light of Christianity, in the connect come this reprivate is, mercle car much of their nature and value, and matrix Therefore in the spirit quality in a committee a great trick made in the field, in Your full possession. Many sloves in this country before order and the nature and operations of tree government, from the common tree popular tion of most a bers. They see no indexe dust to ha endoor dum the persons, and how is a to rows summent of xines and more the laps of their masters, and requesings of admoving ato, others treespect and rightof the whole class of white courses, are harded the particular manumities of equilibries, and of a linguistimation. All he care emission Libraria bare Lear thas educated, is an chave been will be the a Transcareal uncound the meetions arts, while not a few have acquired no small knowledge of letters & harge portion were members of the Caristian clairedite for the y tofe our Somethors good testimony by their lives, to their sincerity and faith-

Such are the people who have end arked, under the direction and patrons of of a bangvolent association, to a sublish and build up, on the west of Africa, a free and Christian commonwealth. The result of their cours, seemer visual redustry, though the whole amount expended to the principoval and for the release it, will be ally equal the content wo ships of the lines is seen in a world-originized and well-governed republican State. with courts of pistics, hells of legislation, schools and scinni mess a tree press, and the entire frame and appendages of an improving civil commaeary, extending their lawful jurisdiction over some hundred miles of coast, and the influence of their manners, and the power of their example both into the interior, and along the coast, much further. Neither in the form of their government, their military discipline, the spirit of their laws nor in their purposes of improvement are they interior to the carliest American colomsts. They have waged an effective war upon the slave table, released many of its miserable victims from captivity, and proclaimed to manerous have en tribes the Truth that enlightens and saves It is true they there be in exposed to discours, trials and temptations: to the rather as of a trep est character aid a luxuriant vegetation, to the occasional his they of the first to agent they there we want to a man from want of a post, it, is, need of non-post above or the and any, and to the stimode some interest of the discussion of the form the concentration of the contration of the contration of the work of farm on visit and one continued to the continued may uncertainty to the following the computation of the contraction o country of the state of the state of

"The oil of those is, with the exection of Cape Mesurado, on which Montovices built. The refiness and totality, equal to some of the fines.

this is the content of the content o

Dr. Gould, who visited LR main 1855, says .

If A proper attention to the collapse on of the soil would soon place the volony in a most the relative one happy condition. The soil, though apparently of the some or caty of the Maryland good lands, seems, nevertheless, to be much more productive; and requere markenly easy of cultivation, we still soon return a rich reward to maistrious turn its. Cotton, sugar-cane, with a tolongo, and a valety of one rarticles of commerce, may be cultivated to allows the valety of course.

Dr. Gone h. physician to the Methodist mission in the colony, wrote in 1828.

"Here we those who enjoy wealth and live at case; here the inhabitants enjoy all the conforts and luxures of a soil the most fertile, well vatered and best undered, I have ever seen."

Dr. Blodgett, after visiting the colony the same year, testifies:

"The soil, after leaving the brach one or two nules, becomes very settle, and will not suffer by comparison with the same lands in the State of Mississippi. In short the country wants nothing but industry to make it a place of delightful resilence."

The R v. John Seys, superintendent of the Methodist mission in Libertia, in his return from Africa in 1835, and .

That the soil of Libert is retained a none of induced a wealth to the colonials. If we are all adopts to the colonial the automatic. He knew off about the colonials and the soil of Liberta, and this was in a colonial of muon. It was ted nothing but cultivation, and it would repay the labor of the agriculturest ten-fold. He here publicly declared it as his automount, that if the Society would raise and put into

the hands of an agent, the sum of \$10,000, to be laid out in the culture of sugar, it would clear all expenses, and in five years would nett a profit of \$100,000. This might sound cloimerical, but he knew what he was saying. He had gone certifiely into the calculation, allowing largely for all expenses, and this was the result. The lands of the colony contained the means not only of rendering the colonists easy in circumstances, but of carriching them with every thing that could render life desirable."

The Rev. Dr. Skinner, once colonial physician, and subsequently governor, at the same time, went on to give

"His fullest sanction to the statements which had been made by the Rev. Mr. Sevs: so rich was the soil and so abundant the means of living, that two hours' labor out of the twenty-four, would furnish a man with all the conferts of life."

In 1832, two respected free colored men (Messrs, Simpson and Moore) went from Mississippi to the colony and remained three weeks, examining all the sculements. They become satisfied with the country, and soon after their return emigrated (hither with their friends. In their report they say:

"The soil at Caidwell and Millsburg is as fertile as we ever saw, and much like the land in Mississipp. We saw growing upon it, pepper, rorn, rice, sugar-cane, cossala, plentains, cotton, oranges, lunes, coffee, press beans, sweet potnors, water-melons, cucumbers, sousop, bananas, and many other famis and vegetables."

Captain Crowell, of Massachusetts, who visited the colony the same year, after mentioning other blessings, says:

"To these advantages may be added that of a most rich and promising soil, well adopted to the culture of all the tropical productions."

Captain Vochees, of the U.S. Ship John Adams, touched at Liberia in December, 1823. In his report to the Secretary of the Navy, from that place, he states:

"The country is fertile and productive of every variety of sustenance necessary to man; and no settler, however poor, with industry and frugality, after a year's support need to be in want. The settlement must move onward, and, with all its disadvantages, it appears a miracle that it should be in such a state of advancement."

The Rev. J. B. Panney, first a missionary and subsequently governor of Liberia, wrote in 1835;

"We shall triumph. The advantages of soil and products and freedom which exist in Liberra, will, when prejudice yields to sober reason, induce the high-minded and enterprizing men of color in America, to emigrate on their own resources. The crops of arrowroot, coller, pepper, and cotton, exceed all that can be boasted of in the United States. "By a very careless trial of arrowroot, it is ascertained that at ten cents per pound, the land will, with very little trouble, produce at the rate of \$100 per acre: and so of other crops, sugar-came, coffee, and cotton."

The Rev Courtes Reliaven spent some days if the colony, in the autumn of 1856, and rook special pains to examine the country and the condition of marky all the settlements. The writer:

"The soil of Liberry is various, being where I by its position, its degree of elevation, and other similar causes. Directly on the ocean, and along the braks of the rivers, a light, warm, soudy soil has in some places been thrown up by the water, winch will yield sweet potatoes, beans, and cassada, but will out monore the crops will be small.

6 The next and is bettom land, of strong, light-colored clay, which is sometimes manifed with sind and dark lemm. It is productive, but is exposed to injury from the extremes of dry and wet weather. The rights; soil, however, and that which is most prevalent in connexion with the different settlem its, is a deep, loose, black mould, of alluvial formation. It extends back from the banks of the rivers, and derives its strength from the wash of the fertile uplants above and beyond it. It is sufficiently moist, is free from stones and gravel, and will give to any crop a rank and hexuriant prowth.

"In higher positions than the last is a red, clavey soil, mingled with rocks and rawel of the same line, all of which derive their color from the oxy le of iron, with which they dround. This soil is of a poor quality,

but may be much improved by manuring.

"The last variety we shall notice is a strong, rich soil, found in connexion with the higher and more reaky uplands. It produces a rank, luxuriant growth of forest trees and plents, but will produce well during the dry months of the year. Lands of this kind, however, are extremely favorable to the cultivation of coffee and other valuable plants, and vegetables "

Mr. Rockwell gives an extended and minute account not only of the productions of the colony, but of the character, manners, and condition of the sculers, oppose extracts from which will be found in this Journal for August and September, 1812; has one fact dropped incidently we cannot forbear to mention. He observes:

" Sweet practices will grow every season of the year. were brought to us by the colonists in canons, some of them two sty miles from the coast: and in such abundance were they offered us, that, though we supplied our ever of nearly five hundred in a with them, get many more were brought to its thing in could firmish a market for.

[Compare the statements of Mr. Rockwell in his " Sketches of foreign

travel and life at sea," with those of Dr. D. F. Briene meths "Wanderings on the seas and shores of Africa," as both author, were in Labour about the same time.

The Rev. Dr. Savages Episcopal missionary at Cape Palma in a relating the meidents of a trip up what he terms the "Noble Cavally "arver, savs:

"A highly attractive object, to my New England eye, was marze, so frequently seen upon the banks of this river; and another no less reviving to my southern associations, was rice;—both of which are produced here in perfection. The rice turns are very extensive; and at one time are seen, as we ascend the river, through a smell opening among the trees, made for a landing place, expanding far beyond into ficids of many acres; at another, the brush being cleared away to the very verge of the river, unfolds to the eye an immense expanse, waving in all the luxuriance of nature."

The late Governor Buchanan on his arrival in the colony in 1836, wrote:

"Liberia far exceeds, in almost every respect all that I had ever imagined of her. Nothing is wanted, I am persunded, but a better system of agriculture, and the permanent establishment of schools, to bring the people of Liberia to the very highest point of the scale of intellectual refinement and political consequence."

This same gentlemen in his despatch of the 13th of December, 1840, reported 7,205 codec trees growing in Monrovia and the adjacent villages, and 23,000 in the three settlements of Pessa Cove, Edina, and Bexley At the close or that month, premiums were awarded for the cultivation of codec trees to 8. Benedal, for - - 3,060 trees.

Without attempting here to review the uninished work of Dr. Bacon, we suggest that the preceding sentence may explain many of its dark surmisings, discouraging early attrees, unpromising predictions, and strange and extraordinary statements. A white real in Liberta reflig upon the opinion of the Doctor, eachly hardly expect, were this opinion correct, to find it concurred in by the people, and if an error, must impute his exemption from manifestations of public indignation, either to entirent virtue and forbear area, in the community, or to some remersable protection of Providence.

But the inquiry may be netural, why, it the famility of the Liberian soil be great, and its productions such as have been represented, why so few. if any, have been brought into the markets of the world? The answer is obvious. The emigrants have generally gone out with little or no proper ty: they have received but very limited assistance; have been compelled to engage in the construction of their houses; the clearing of the lands; in the culture of such vegetables as were most necessary for their immediate subsistence, and such barter trade with the natives as might give them the most speedy and profitable returns. In a new and uncivilized country, exposed to the trials of a tropical climate, and in their earliest set tlement not unfrequently to the hostility of the native barbarous tribes. they have directed, of necessity, their principle energies to secure shelter security and subsistence. No rich capitalists have been there; no treasured commodities of all clines; no labor-static convenience; and but very imperiest knowledge, and seareely any experience of the cultivation of the choicest productions of the tropies. Our worder is not that they have done so little, but that they have done to much.

who are your few spits, it also seem the plantam and partitions, which, ough sort, we upon partitionable plants, each trunk dying as its faut is concern, it is height, are and proportions of the disks.

ing young trees. Of these, as of the other trans, we only find enough of show how easily they may be raised, and to make us work or and complain that they are not produced in satisfact by a processor. The area may be said of the papers, and of garden regulables likewise. There are to do latter, this negligence appears particularly colleable, as even the than rock. sed of the Cape, with the most ordinary entitivation, wal preduce not only the vegetable of the tropies, but also most of those which are found in the gardens of temperate regions, some of which here flourish percimativ, is graining little absorption to make them wield a continual crop for several seasons; such are line abouts, and other legiums, which, when one ; lanted produce righly for a long time. Even the roots natural to warm is stoned, to capable of this repeated production. The sweet potatous are pulled up, the roots picked off, and the green tops stack in the ground again to relieve even in the first shower." Askin: "The appropriate gram of this climate and region is rice, which is cased in great abandance and excellence by the natives, from the Gambia to Ivory Coast, and to an unknown distance interior. On this part of the coast, too, this great stople is cultivated with minutely less labor than in other tropical regions."

We notice that Dr. Bacon, though he could see no evidence of the saccessful cultivation of the sugar-cane and coffee tree, does not deny the nature of the soil and climate to be suitable for the production of the sugar-cane coffee, and cotton. From a letter of Dr. W. Johnson, who had resided four years in the colory, dated June 3d, 4511, we copy the following extracts:

"All who have tried the Liberia coffice as far as I have heard, say that it is equal to the Mocha or Java. The usual cost of clearing land in Liberia and introducing a copy of rice, is worth about five dollars in goods at African prices. The coffee requires rather close topping after it is two feet high, as the clongation of the lower part of the trunk will even then make the full grown tree six or seven feet in height, which it ought not to exceed. It always bears, when cultivated, in the third year, though but a small quantity. There is a large increase in the product every year, and in seven years, I think from my observation of a number of trees of about that age, they will average four pounds per tree. We have not get seen the tree attain its full growth, but it doubtless requires about fifteen years. To the West Indies it is said to grow twenty years. The Towest estimate of those in the colony who have raised, measured, and weighed the coffice repeatedly, is five pounds per tree for an average production. This is quite extraordinary, as in the West Indies the average crop is stated by very respectable authority, to be at full bearing, a figure of a thousand pounds to an acre, on which they plant about seven hundred trees. A coffee tree in Monrovia yielded last year two bushels, three and three-fourths peaks of 3) ries, which produced sevente a possible of chancel and covid coffee. Such tests as the scarce to be explained by the appearance of the trees They will grow, it not to, per down, to the Bereli for the say fort, and whi cover the feet square of book while the extension the board is in the West Indies is not much larger the called of a trocal cold. It is not to a sure of that human nature midenly loses all its weak-

nesses and imperfections by crossing a ocean, or by any seven cumstances thowever favorable to us elevation, among which it may be introduced, nor would it be reasonable to look for an immediate degree of advancement among colonists, composed of a people, long depressed by adverse and withering influences, not a few of them by slavery, beyond what would be expected of the most livered of our race. We have thought the work of African Colo uzach a admirably adapted to strongther. the intellectual powers and nurture and develop the moral faculties and dispositions of those who might engage mait, and that we might justly anticipate in the community of Liberia, a sure if not rapid progress in knowledge and virtue. We have never claimed for this people entire exemption from the vices, which have more or less existence in all countries, and in all numerous classes of human beings. With very few exceptions, the reports of those both loon to United States and England, who have visited or a sided or hoserin, have been such as to create, belief in the general contentment, sobjecty, industry, and good character of the colonists. Their own epinions and senuments, the colonists themselves, are best able truly and fully to express the September, 1827, the inhabitants of Moncovia addressed a quenter to their brethern or this country in which they sand

in the character or condition of the people of this colony, it never can be charged to the account of the country, it must be the feuit of our own mismagnement or slethfulness or views. But from these evils we confide in 11 in, to whom we are indebted for all our blessings, to preserve us.

"It is the topic of any weekly and daily thanksgiving to Almighty Godboth in public and private, 'and He knows with what smeerity,) that we were ever conducted, by his Providence, to this shore."

"Trails we have a gradity herringer, and of there is any thing lacking

In September, 1836, the environs of Monrovia again assembled and in a series of resolutions enjoyessed the characteristic attachment to the scheme of African Colonization and then see may be to a striends. Among the resolutions adopted on the coccasion we find the following

"Whereas, it has been widely and maliciously circulated v) the Timtest States of America, that the inhabitants of this colony are tunn ppy in their situation and anxions to return, on motion of E(r), B, R, B, d > m,

v(Re)/v(I) that this report is talse on branchenous, and originated us a disign to improve the colony, by colling oil the support and sympathy of its triends, that so for from a desire to return, we would regard such an event, as the greatest enlamity that could be all v(I).

In evidence, of the conference the colonists, with their condition and of their generally connect lights of temperature, inductive good morels, and respect for the Salda for and the values of religion, we might dduct testimony from more enspectable symmeters not only from the

country but from Great Britain. As far back as March, 1828, Captain Nucholson of the United States sloop-of-war Ontario, wrote to Mr. Clay;

"All the colonists with whom I had communication, (and with nearly the whole of them did I communicate in person, or by my officers, expressed their decided wish to remain in their present situation, rather than return again to the United States. The appearance of all the colonists, those of Monrovia's well as Caldwell, indicated more man centent in it. Their manners were those of freem n, who experienced the blessings of liberty, and appreciate the book."

Fr Smallar statements Copt. Shere an writing in 1830, Copt. Kennedy of the United States Ship Java, in 1831, and Capt. Abels, Copt. Crowell and Capt. Page of the United States schooner Box in 1832, concur.

In October 1834, the Rev. John Seys wrote from Monrovia to Gerri-Smith, Esq.:

"Hyre are to be seen intelligent, sensible, and in many cases well educated colored gearlemen, with whom it is pleasing to converse, and whose houses and families give evidence of good order, morality, temperance and industry. Here are ministers of the Gospel, who add to all this a faithful, and zealous and untiring zeal to promote the cause of Christ generally, and as it should be, to promote the prosperity of them

respective denominations.

"They have not classical education, but who is to be blamed? And while they receive no remuneration, no salary, and are obliged to follow a trade, to be entangled with the affairs of this life, to procure an hones livelihood, is it not much to their praise, that they fill their appointments, and go up the rivers and creeks at their own expense, to teach their brethren and neighbors the way to Heaven? There are members of several Christian churches, who, at the sound of the church-going bell, are seen on the holy Sabbath, slowly and reverently assembling in their respective places of worship, to adore their Creator and keep his blassed day. In tact, the Sabbath is held sacred in Monrovia."

In 1835, the Rev. B. R. Wilson, (an intelligent and religious colored man who after spending some time in the colony had returned for his family) wrote for publication:

"The morals of the colonists I regard as superior to the same population in almost any part of the United States. A drunkard is a rare spectacle, and when exhibited is put under the ban of public opinion at once.

"To the praise of Liberia, be it spoken, I did not hear during my residence in it, a solitary oath uttered by a settler; this abominable practice has not yet stained its morel character and reputation, and heaven grant that it never may."

Captain Outerbridge of the brig Rover, visited the colony in the summer of 1835, and August 5th, wrote for publication in the New Orleans Observer, of the people of Monrovia:

"The inhabitants appear to enjoy very good health, and are very friendly towards one another. The people of Monrovia are all for trade

and are all very pious, and I can say, to my knowledge I feard near a word of the case while I was at Momovia amono die Americans, colonisis; for it by a life to that they mall lift off the practice, as well endingling, and on well see them all goeses to church on Sim by three mores a day, and a see up a to be very street in these levotions; as you commot get a cross work on Similary, not even the matrix s."

The Rev. G. W. delliroy, on his return from Libertein December, 1835, years:

" As to the probably on the colony, it is an eneral good,"

Cappan Vem. Hut on, an Hagli Jame, and agent of the Western Africa of Company on a visit to the colony in October, 1836, taker speaking of the advantages of the place, and the friendly and hospitable manners of the infabitants, and of their gurdens, which he pronounced in good order and well enclosed, where he had observed,

" Unrecabbares, encumbers, parsley, beans and other vegetables, as we'll sethe most deflectors fruits, such as pine-apples, oranges, grapes, graves, onsepe, the African cherry, melens, and femons:" headds "I must also do the mimbit mis the justice to say, that they are a highly respectable, moral, intelligent people."

The R.v. J. B. Panney, then the late governor of Liberia,) in a speech in New York, June 28, 1836, after speaking of the destitute character of migrants, many of them liberated slaves, on their arrival, said,

"Could they be expected at one; to produce a great and wide effect on the native population around; yet they have built them houses, and clared as, and school-houses. To expect that they should while struggling to effect this, open their houses and till them with the children of natives, him tachers to instruct them, and ministers to preach to them, and give away hilds and treats among them would be a most unreasonable expectation. Yet something like this has been done by these poor colonia." They are taken naives into their lamilies, and taught them the customater, and they have exerted an effort disabelly beneficial upon them als. I do not say the all the colonists are moral. Would to God they were. With people in New York are not moral. But most of his poor propile are nord, and what is far better, they are passes men and man. They have error a later thouses for divine worship. They have an error applies the flag thouses, many of their of stores. They have an error and house and doling houses, many of the error domained dolings the parts.

The Literary of Gramma Buches on the 5, on a war observating as roughtered Africans, wrote:

to Whence of present in these, then find considers when in (0) and so one, of all the lovely commentary on their because of all the considers of a people have made in civilization as I Characteristic medical and a people where the constant of Concept. Here in to voice that the constant of the constant

swept side-walk in Philodelphia, and fine I with well-painted hedges of cassada and pulm—Houses surrounded with gardens luxuriant with fruit and vegetables—a school-house full of orderly children neatly dressed and studiously engaged—and then say whether I was guilty of extravagance in exclusions, as I del, after surveying this most lovely scene, that had the Colonization Society accomplished nothing more than had been done in the rescue from slavery and savage habits of these three hundred people, I should be well satisfied." Of his general impressions he says: "were I to obey the impulse of feeling, I fear you would place me among the list of eulogists whose exaggerated descriptions have done little less injury to the interests of Liberia, than her most ignorant revilers. But after all the curbing I have imposed upon my colonization enthusiasm, and the determination to look at things on the dark side as well as on the bright. Liberia far exceeds in almost every respect, all that I have ever imagined of her."

In 1823 the Rev. Dr Skinner, for a time Governor of the colony, said:

e Of the colonists a large portion are professors of religion. In the settlement of New Georgia, which is composed of native Africans who had been in America but four months, of 375 there are 167 members of the church. Dr. Skinner said that in his residence of fourteen months in Liberia, be had seen and heard of only two intemperate persons, and had heard only one profane oath. In regard to the charge of bitter prejudice against the white man, among the colonists, he said that the whites are treated with respect in Liberia, when they treat the inhabitants with respect."

In 1838 Dr. Goheen, who was never connected with the Colomization Society, but with the Methodist mission, wrote:

"The people are industrious and persevering in their attempts to gain a comfortable livelihood, temperate and economical in their liabits, and appear to be really enjoying life.

Library inquired diligently, and I have yet the first man to find who

would leave Liberia for a residence in America on any terms."

Dr. James Lawrence Day, colonial physician, writes in Feb., 1841:

"I have before expressed to you my very agreeable surprise at finding the colony such as it is—embracing so many flourishing settlements, and having a people among whom you can recognize scarce a lineament of the American slave. Men here, are men, as you find them in other communities, showing as they do a proper respect for themselves and you; you cannot remember your former prejudices, however strong they may have been, but meet them at once, without a reflection, on terms of perfect equality."

A distinguished English officer, who had been three years on the African coast, speaking of the people of Liberia in 1832, observes

The character of these industrion colorosts is exceedingly correct and moral, their minds strongly impressed with religious feelings, their manners serious and decorous, and their domestic babbs temperhably near and comfortable."

Lieur, Colonet H. Dundas Campbell and between audience in London, in January, 1841.

"That, during the three years he had been Governor of Sierra Leone, he had frequent opportunities of observing persons from the colony of liberia, and he had always found them very superior in intellect, besides being excellent mechanics, and generally very moral and well-conducted. In fact, he would candidly say that no persons in his own colony equaled them. From his knowledge of the interior of Africa, he took upon himself to say, that it was by the establishment of such colonies as Liberia that civilization would be efficient there."

Capt. Stoll of the British navy, who visited the colony in 1810, says:

The colonists with few exceptions, are all members of churches, and I can safely certify, that a more orderly set of people I have never met with. I did not hear an improper or profane expression during my visit. Spirits are excluded in most if not all the settlements. They have formed themselves into various societies, such as agricultural, botanical, mechanical, for promoting Christian knowledge, also a Ladies' society for clothing the poor. I went there unbiassed, and left it with a conviction that colonies on the principle of Liberia ought to be established as soon as possible, it we wish to serve Africa."

Finally we concinde this mass of testimony with that of Dr. James itail, who long resided in Liberia, and has been intimately acquainted with all the settlements of the colony, for the past eleven years, and whose perfect candour and integrity, accuracy of observation, and remarkable sagacity and soundness of judgment, are admitted by all who know him.

The Liberians, rays Dr. Hall, have shown a capacity for maintaining a free and independent government, a capacity and disposition for a fair degree of moral and intellectual improvement. The soil of Liberia is one or the most productive rights world, and capable of yielding all the varieties of vegetables, as tall the staple commodities of the tropics. The climate of Africa is one that will prove as favorable to the American emigrant, as does the climate of the Western States to the New Englander. In fine, all that it necessary to favor and perpetuate on the coast of Africa, an independent Christian government, is an increase of the number of clert emigrants, an increase for a certain period, of the appropriation to each individual on his arrival, and a general protection from the government of this country."

If, then, upon this concurrent testimony from colonists themselves, from tree colored reac, who after careful personal examination of the soil and settlements of Liberia Jaive removed thither with their families; from captains of merchant versels, American and English, from missionaries; from trese who have retired from offices of responsibility in the colony, from intelligent and distinguished navel officers of the United States and Great Britain, and from the late Governor of Screat Leone, any reliance con be placed, it is impossible to doubt it at the to inducers of a fee Christian.

I immonwealth are wended in Africa, and the first productionity of African colorn and also can be "fainted extent, a common rated little for the facends of God and main in this country to consult a how countries so were on, and it is beneficiant as not as their power and influence extend, so a hair this descend and attended for process, and influtly consider and festered, the aspects constants to one quarter of the choles shall be usuared, without a large to during to one quarter of the choles shall be usuared, without a large to during the restriction of the choles shall be usuared, without a large to during the rate of the African rate.

(We have some company solids, the form of south and entire was and the color of section and be executed without the Irelandy to one of and the majority for inseperable from all the works of new . We must be willing to labor in the triby it of our has whell e, and so leave our loss tell forts often distribed and compare of by the informities, the projudices. and the program of markind. To except the effect of the mance, mittake and perversences, we must needs go out of the world. With multitudes, powder of inion, however about 4, has the force of law, and ridicule is the test of trath. A word of contempt, a shadowy and uncertain rumor, will shak, the fach of some in a cause, the merits of which all history ilbusinates real all sound argument continues. In view of the evidence we leave here exhibited of the corplition, character and importance of the colony of Liberia, we call upon all the canors, clergy, statesmen and Christian's of the country to awake and arise with united energies and build at up, as are renerating power to Africa and an everlasting monument to the pruse of our plan chropy and religion. Why this sale is, doubt, a why? Why slumber the churches is though no knell sounded, appallingly, from Africa over the perishing and the lost? Vely sleeps this whole nation as deaf to the majestic voice of Providence, specking not less audibly than when it summoned the hosts of Israel to go forward? Why he state our statesmen in their places of bonor and responsibility to propose and advoentermeasures in support of this scheme, so closely connected with the permanency and glory of our bision and the best interests of the two most numerous races encomposed by its limits! Will delay diminish the evils to be remedied, the difficulties to be overcome, or the expenditures to be made? Shall we indofeatly resign all the honors and rewards of the emerprise to our successors, and invite by our deeds of compassion, no reducined chaldren of Africa to come as all gains and scatter their fragrant flowers, and shed their grateful tears upon our graves?

What should be done to unite in more congretic measures the friends of the cause, and increase the finds of the Society, to strengthen (if it has been weak, ened), the confidence of all the friends of missions in the scheme: to obtain efficient aid from the States, and the General Government; to secure a recognition of the neutrality, if not independence of

The county from Edgealic and other povernments, are induced which heaves as Tell serve the consideration of the Board of Directors

In the fulfillment or the stipulation of the treaty with Encland, in reis a to the develop, lead with lone sy for the government, through its squad on on the African coast, to extend ade protection to our Mrienn serbparents, and should a commissioner or commercial agent be appointed, in in potention with name African tabes, to increase immensely the advantages of our own commerce, and at the same time promote the interests and extend the inhuen of Liberta. But we cherish higher hopes. We know of netheng in the constitution, or in reason, to prevent a direct appropriation of conds by the government, to enlarge the Liberian territory, or assist emigraon to the colony. As a powerful, the most powerful auxiliary, to the supthe second the slave trade, and the increase of our lawful commerce on the Micron coast: it presents a just claim to our fostering care, as a means to hose great ends. If both those great ends can be attained, most certainly ad effected ty and comorpically, by calarging the extent and authority nd requirem of Fiberia, why should not direct appropriations be rande for this purpose? At all events, every thoughtful man will admit that if our African soulements are contributing, and in no small desee, to the suppression of the traffer in claves, and to the encouragement. - gity on becomes of American communes, the great objects for which, it is vive expense, we resintain a squadron on that const, it is right and proper that such squadron should more protection to such scalements, in Leo-operate in the well directed enterprises of their citizens to extend se inflar nee of their principles and nuthority.

We conclude the article with the following remarks from an eminent zend of the Society in hon 'on, to whose zeal and calm but effective real onings and appeals, not only the Africans, but many other portions of one filter broadeness are decidy in defend.

LONDON, 12mo., 5th, 1543

- to I roun the African Ripostrop, who a I now receive, though not always aduce ears). I am glob to bear that the colony of Laberia appears to be a substraint as flourishing a state as an any period of its lastory. Time that is you trout time man mornal, been in the light of tribing good with the time of effected no traders of this description are more aumeror of the consessed from your own American end his. The Bruish explain how, lowever goes to a spot of all left is likely across and let us a larger this made with the courses, who can Macronia ender a 12 hours and of and seizes his the providing limit also is englished in connectend trade on a pro-back part of the looks. The maker is the complete test complaint to nome Brits', by he licer is map; and is quantities and demonant of come rapped a "slow, who dollar it, the costruction less been made on no French, Desert, Polyngheser. The retipens of the coast, and knowing that the American Covernment holes are a regards the transaction as a not thought the record of the complex mean the class of the case respected

The steps which follow may be very addicated and blamable, but they are the acts of an individual, of a class not always the most discreet, proceeding from a palpable defect which the colony or the United States Government should supply. I have myself written to your excellent minister at the British court and I have his written answer that he could not take up the matter in his official capacity, but that he would mention it privately to one of the Queen's ministers. I think Edward Everett was perfectly correct, but what can such private statements do against official emaplaints regularly presented. I likewise saw a tory member of the Committee, Sir T. D. Ackland, who listened most kindly to my statements and presented the documents which I produced, which has led to their being printed and published in the proceedings of the Committee. Ail this can only influence the private opinion of a few individuals so long as no steps are taken to obtain the recognition of Liberia as independent, or as a dependency of the United States. Our British Government will not take the first step in either mode of recognition. It does not even readily recognize the new colonies formed by its own subjects. The plain and reasonable course to be pursued is for Liberia to send a deputation to make the demand in form, and at the same time furnish such explanations as will be required, before the request will be acceeded to. Thou must well remember the practical difficulty with which thy own personal application was met because made on behalf of a society and not on behalf either of the United States or the Liberian Government. 1 have for years endeavored to vige the adoption of this only straight course, and would exert myself to facilitate the steps which might be required, yet nothing of the kind is attempted, whilst the evils continue to be repeated and allowed to be the subject of complaints put forth in a spirit which can scarcely fail to engender those bad feelings between Americans, English, and Liberians, which the friends to each, and to humanity generally, cannot fail to deplore."

Fred torn , Let

The twenty-forms Anniversary of the Vertice Community is seen as the Brick Charel, in this village, on Thorney version of O tober 1997, Account Israel F. Dana, President of the Society, took the chair, at 7 o clock. The meeting was opened with appropriate music from the choir. Daniel Baldwin, Esq., Treasurer, presented his report, from which, and the accompanying statements, it appeared that about \$650 have been raised in Aermont during the last year for the American Colomization Society, and this without the employment of an agent. The Secretary, the Rev. J. K. Converse, of Burlington, then read an abstract from the Annual Report, showing what has been done by the Society the last year; with a brief sketch of the doings of the Parent Board in sending out emigran's, Turchasing territory, &c. The report contained an array of inconfestible facts from Gov. Roberts, from colonists, from missionaries and may deflicers, illustrating the generally good condition and progress of the colonists

The Rev. George W. Campbell, of Newbory, then I of in prayer; after which, the Rev. W. Mitchell addressed the audience in an appropriate discourse on the history of

shavery and its remedy. It is expected that the discourse will be published.

At the close of Mr. Mitcheli's address, notwith standing the lateness of the hour, a Mr. Constantine, lately a Baptist Missionary at Elling, in Africa, was called on to make some remarks. It was known that Mr. Constantine was not friendly to Colonization, that he was a zealous abolitionist, it, the technical sense, both before he went to Africa, and since his return, and that he had been acting, coring the day, with the Laberty Party Convention, in the Free Charlett. Still, we all wished to hear what Brother Constantine could say; having no fear that the principles on which the scheme of Colonization is based, or the mass by which it is made to commend itself to every caudid an imtelligent mind, could be scaled. In compliance with the special request of Mr. Constantine's friends, by was called a replatform. Mr. C. a pours to be a pie is man, and to feel deeply for the initials of the colored race. Yet it was obvious to all that this views, that received their slame in the dering from the strong enlistment of his feelings in a Society which has seen it to appose the Colonization Society. We took brist notes, and shall present the substance of his volunteer remarks, and of his answers when cross-examined. On the whole, his statements commer d Colonization to our warmest confidence.

The substance of his volunteer remarks, is as follows .-

1st. Mr. Constantine said, when he first arrived in Africa, he visited Monrovia; that the colonies were then under Gov. Buchanan, that the Governor called with him upon a number of families, that he found them living in affluency, and was very tavorably impressed, but that he afterwards dearned that there was a good deal of poverty and idleness, that he saw some of the engrants that were ragged and dissatisfied, and wished to return to this country, to the service of their all masters. When cross-exammed it appeared that Liberia has some lazy and shiftless persons, such as are to be found in every community

21. Mr. Constanting said, that Gov. Buchanan told him, that when he succeeded to the government has found some of the colonist and refation aking characters for the stay stays and this subment and his remarks appear to soft without questioning, a word have left the impression to this appropriate and with the approbation

or product sensing out and on the coloural authorists.

Cross-symmetric Dayon say that the colonist oriently users the clavers, and make shrickles for Seria. Mr. C. S. No.?

"Do you say that blacksmiths in the colony of her shifted with the approbation of (see a domaing eventagent, or of the public sentiment of the adonates stee Corresponding to the domat."

Defined the product of the following stackles in behand only oblic sentiment, and on large runs (1.2) and operation on this country keep a tippling shop for gain?"

Als Country as the did."

" Denot the coloural authorities do what they can to hinde, and break up the slave

Mr. C. + They probested oso, and I for this what they do."

Mr. C. went on to state that there is sail one share factory on the Bor and s of coast o which the name this ria is applied. But on long questioned, he stated that this one vactory out to the soil of the colony, nor within its arrisdiction; but upon territory still own only analyse chief-which the Colonical of Society is now striving to obtain the means of parebasing. To is from the testimony, it appears that there is but one slave factory now, where there were perhaps twenty before our colories were planted there.

3d As it has been said by the opposers of Colonization, that the colonists reduce

the natives to slavery. Mr. C. was requested to speak on that point.

The said the aroung natives from 15 to 25 years obe penerally forthe work of the

colonists; that they are treated with a great deal of distance, that then is (gious instruction is neglected; that whole most of the ability about some inembers of the church, and attend church very constantly on the Sabbath, the native young people are not brought to the house of God, nor instructed in the families in which they live

Cross examined. "But do's slavery exist in the colonies?

 $Mr,\,C,\,\cdot\,\,No,$ not exactly. The native young people do most all the work and are not treated as they ought to be,"

"Do they not receive wages

Mr. C. "Ves."

" How much do they receive "

Mr. C. " They receive their chop, (i. c. their rice,) their cloth (clothing,) and it. addition to this, what costs the colonists perhaps ten dollars, (i. c. for a year.)"

"But do not these natives enter and leave the service of the colonists just when

they please 17

 $\dot{M}r_{\rm e}^{\prime}$ C. "Yes they do,"—Thus endeth the Tesson on colonial slavery. The sum of the whole, is, that the colonists hold slaves in Liberta just as we hold slaves in Vermont: i. e. we and they hold —hired nelp—who come and go when they please.

1. " What is the inthinger of the colonists in respect to civilizing the natives and

facilitating the work of missions?

In answer, Mr. C. went on to state that he did not receive all that support and and from the colonists in his missionary work, which he expected when he went out, —that pealousies existed between the natives and the colonists, and that the latter sometimes spoke contemptionally of the former. Cross-examined. "Does not the hostility of some of the natives to the colonists arise from the efforts of the colonists to break up the slave trade, which the natives, for the sake of gain, desire to perpetuate:" Mr. C. "I den't know but it does."

"Was ever a mission established and sustained on the Liberian coast, by either Moravians or English massionary societies, until such missions had the sheltering and protecting inducate of our colonies." Arr. C. was understood to admit that he knew of no mission ever lawing proved successful in fill our colonies were planted there.

of no mission ever laying proved successful will our colonies were planted there.

Thus we have brought to view the leading points upon which Mr. Constantine remarked, and have given as nearly as possible, from our brief notes, the mords of his answers. When it is considered that Mr. Concludings bimself not friendly to the Colonization Society, it will be seen that his answers contain important testinony in favor of our cause. We suppose that any man visiting the colony, and fixing his eye only upon the dark side of the socry, might present a discontaging picture. This might be done of any community, for every community has its naths, its loafers and beggars, and it examples of mal-administration of law; and it would be strange indeed it liberia were free from these exile. All we contend for, is, not that society in Liberia has all the country's conveniences, and refinements of New England, but that, all things considered, the colories as a loing will, and exerting a good influence, and already give promise of being the Physionth of Africa. The Report, when published, will show the grounds of this tast.

The ervices of the country were closed with the appointment of the following gentlement as officers of the Society for the ensuing year

Hom. Samera C. Craits, President.

AFRICAN REPOSITORY,

AND

COLONIAL JOURNAL.

VOL. XX.]

WASHINGTON, FEBRUARY, 1844.

[NO. 2.

TWENTY-SEVENTH ANNUAL REPORT

OF THE AMERICAN COLONIZATION SOCIETY.

In the opening of this Report, the Executive Committee, acknowledge with reverence and submission, the afflicting visitation of Providence, by which the venerable Dr. Proudfit, a Vice President of the Society, and for several years the devoted and able secretary of the New York Colonization Society, has been removed from his labors to his reward. He died, after a short illness, on the 17th of April, cherishing even in his last moments, the holy sentiments that had so long animated him as a Christian minister and philanthropist, and an unwavering confidence in the character and success of this institution. His eminent faith, devotion, and charity were evident to all who knew him, and the people of Liberia, and thousands in whose bosoms he excited sympathy in their behalf, and from whose benevolence he drew generous contributions for their benefit, will cherish the remembrance of his distinguished exertions and His voice of persuasion and encouragement was heard in this hall, at the last anniversary of the Society, and though dead he still By his works and his example he will continue to live, and by an influence to which time shall add only increasing extent and power.

With painful regret, the Committee also record the decease of the Hon. Wm. Halsey, of New Jersey, a gentleman, who during several of the closing years of his life, engaged with zeal, energy and perseverance in efforts to make known the views, and increase the funds of the Society. He visited repeatedly many parts of New Jersey, excited the public mind to confidence and activity in the enterprize, diffused information,

replied to objections, and induced many who had been indifferent, to feel and manifest an interest in its success. Among the last acts of his useful and honored life was the publication of a pamphlet, exhibiting a brief account of the origin and results, as now evident, of African Colonization, and of his own endeavors in co-operation with the State Society of New Jersey, for the advancement of the cause. This institution, the State in which he lived, and Africa so deeply indebted to his labors, will remember him with affection, and long deplore his loss.

On the ninth of May last, seventy one of the slaves left by Mrs. Margaret Alison Reed, of Mississippi, to Dr. Stephen Duncan and the Rev. Zebulon Butler, embarked at New Orleans, in the bark "Renown," chartered by the American Colonization Society, for Liberias. Six others, free persons of color from Mississippi, accompanied them, which (one child a few months old having died on the passage to Norfolk,) with three of the same class from Charleston, made the whole company that sailed from this last port, seventy nine. In this vessel, lumber and trade goods for the benefit of recaptured Africans to the amount of \$1,500 were shipped by order of the Government, which also sent out as freight to the amount of 1840; barrels of provisions, to be landed at Port Prava, in the Cape De Verd Islands, for the U. S. squadron. This vessel was, after having landed a part of her cargo, unfortunately wrecked at the Cape De Verds with much loss, though all the passengers were saved, and through the kind and energetic efforts of our consul, F. Gardner, Esq., transferred to the barque Jane, of Massachusetts, promptly chartered by him to convey them to the colony. Though the loss of stores and provisions may have caused some inconvenience to these emigrants, all claim on account of the Renown ceasing with the nonfulfilment of the terms of the charter party, this unfortunate event proved of no pecuniary disadvantage to the Society. Intelligence of the arrival of this company at the colony, though for some time expected, has not yet arrived.

Early in November, the barque "Latrobe," sailed from Baltimore, with between seventy and eighty emigrants, nearly all manumitted slaves, and under the patronage of the Maryland Colonization Society, destined to the colony at Cape Palmas. A worthy colored family, Mr. Herrings, and an intelligent colored mechanic, Mr. Hines, from Virginia, embarked in this vessel for Monrovia, under the direction and at the expense of the Parent Society. The number emigrating to Cape Palmas, thirty-one were manumitted by a single philanthropic individual, Mr. Goodwin, who was present, with a numerous assembly of the friends of the cause, to participate in the impressive religious services at their departure.

By a recent legal decision, twelve slaves in Flemingsburg, Ky., are to

receive their freedom and are now ready to emigrate, and a final decree in favor of the liberty of twenty-one at Richmond, Va., is expected the present month, while three in Nansemond county are now ready to sail, and a number from Gloucester county and other places will soon, it is expected, be placed at the disposal of the Society.

The message of Governor Roberts to the colonial legislature in tho early part of the year, and his subsequent despatches, afford gratifying evidence of increasing attention to commerce, agriculture, education, and various public improvements. By the colonial law, a common school is to be established in every township of the colony, under the direction of a school committee, to which all persons are compelled by law to send their children, and, while all monies arising from licenses and unappropriated military and court fines are set apart as a fund to support education, and the inhabitants of the several towns and villages are authorized to impose taxes to supply any deficiency. To this subject, the Governor invokes the consideration of the legislature in appropriate and impressive terms. "The condition of our race," he observes, "in other parts of the world, and especially of the inhabitants of this heathen country, should be motives to rouse us to greater diligence, that we may show to the world that the African race is as susceptible of mental improvement as any other. At present there are schools established in several of our towns and villages; these, however, are under the patronage and control of various religious institutions in America, and may be discontinued at any moment. It therefore becomes us to assist ourselves in this great work of improvement, that we may be prepared for any emergency. We can do something and should do something. Let us put our shoulders to the wheel, and when we have done all we can do, I pledge myself there will be no lack of aid. The sympathies of the benevolent every where are enlisted in our favor, especially with regard to this subject; and when it is known abroad, that we appreciate learning, and are doing all in our power to obtain it and cannot succeed, then, and not till then, shall we have the efficient aid of our friends abroad, and be able to establish permanent schools for the education of our youth." There is evidently a want of competent teachers, and of means for their support, and more effectual measures are suggested to the legislature by the Governor to meet the necessity of a more general and thorough system of instruction.

Though the commerce of the colony has suffered from occasional disasters, and particularly from the competition and interference of foreigners, yet it is steadily on the increase. It is stated in the message of the Governor just quoted, that "during the past year three new vessels have been launched at Monrovia, one at Bassa Cove, two, which were foreign

built purchased by colonists," and that three others were about to be launched from the stocks. It may be expected that confidence will arise and increase between American traders and the merchants of the colonies of great mutual advantages, and that these settlements will at no distant day attract to themselves a very valuable commerce from various points of the coast, and the powerful tribes of interior Africa. It is to be regretted, that while Liberia has already done much to enlighten the minds of the native Africans, to excite their industry, and direct their attention to the vast resources of their country, as well as to protect the lives and advance the interests of Americans engaged in lawful traffic upon that coast, it has looked in vain for that encouragement and support, which it so well merits from the Congress of the United States. The committee trust that such instructions have been or will be given to our African squadron, as shall enable it to render that protection and aid to the authorities of Liberia, as are consistent with the specific objects of its movements, and the constitution and true policy of the country,

The agricultural interests of the colony, have neither been prosecuted with sufficient vigor, nor wholly neglected. Of necessity the farmers of Liberia labor under great difficulties and embarrassments, and in the cultivation of the most valuable productions of the tropics, must be expected to make but slow progress. Trade, as the more easy and rapid means of support, naturally and principally occupied the attention and efforts of the early settlers, to the neglect of agriculture, the more sure and certain source of comfort and prosperity. "The soil," remarks the Governor, in his last message, "is good and capable of producing abundant harvests; this will be admitted by all, and in every instance where individuals have perseveringly given the business a fair trial, it has not failed to yield them a handsome reward." Again he observes, "though the crops among the natives last year, in a great degree failed, the colonists, especially in the upper settlements, were generally free from want, and in many instances were able to supply the neighboring natives. The past season has been one of rejoicing among the farmers. Rice crops, especially, have been abundant, and I rejoice to find that the people throughout the commonwealth are becoming awake to their true interests, and convinced that the future prosperity and independence of the colony, depend upon the agricultural resources of the country. Several gentlemen both in this and Bassa county, are turning their attention to this subject, and are establishing coffee and sugar estates, though at present on a small scale. The experiment has proved successful, and established beyond a doubt, the fact, that farmers in Liberia, if industrious, frugal and persevering, may become not only independent, but rich."

A number of valuable public improvements have been made in the colony, and in his message early in the year, the Governor states, that the revenue of 1842, arrising from duties on imports, tonnage and other sources, amounted to \$5.403-53, and the expenditures on public works to \$3,111-12, leaving a balance in the treasury of \$2,242-41.

The constitution and laws of the commonwealth of Liberia, including an abstract of legal principles and rules, with an appendix of forms for legal proceedings, published by order of the Legislative Council, has been transmitted by the Governor to the Society, and leaves it impossible to doubt that intelligent justice and humanity pervade the public mind of the colony, and that in their enactments, a due regard will be had to education, to the necessities of the poor, and to the rights and interests of the native African people. The abstract of legal principles and rules, appears to have been compiled with care, by the former chairman of the committee (Judge Wilkeson) and transmitted to the colony, and to them, by an act of the legislature in 1841, was given the force of law.

On the whole, the committee are of opinion, that during no one year, since the origin of the Society, has the colony been as healthy, quiet, and improving as the last, and that its friends have occasion for special gratitude to Almighty God for his favoring providence towards it, for the good order and harmony of its inhabitants, for their increasing regard to the public welfare and the true resources of permanent individual prosperity, for the spirit which has animated the colonial legislature in the enactment of good laws, and for the wise administration of the same, and finally for the abundant evidence they possess, that the public affairs of Liberia are settled on firm and peaceful foundations.

Peace has prevailed during the year, between the colony and the native tribes, and some negotiations have been concluded, mutually beneficial and promising an extensive influence for the abolition of the slave trade, and the advance of civilization. In the month of February, Governor Roberts visited the Golah country, some eighty to one hundred miles in the interior, and of this region he remarks: "I have traveled considerably in the United States, but have never seen any where a more beautiful country than the one we passed through: well timbered and watered, and the soil, I venture to assert, equal to any in the world."

A treaty of amity and alliance was formed between the Colonial Government, and the principal king and other kings and head men of the Golahs, by which it was stipulated, that all matters of difference which might arise between the Liberians and Golahs, or between the head men of the Golahs, or between this tribe and any other, should be referred to the Governor for adjustment, that the natives of the interior should not be obstructed in their intercourse or trade with the colony, that the slave

trade should be banished from the country, and the superstitious trial by sassy-wood, or other poisonous matters should be forever abandoned.

With Ballasada one of these chiefs, a treaty was concluded in 1840, and in the early part of last year, Governor Roberts was requested to interpose between him and a neighboring chief, Gogomina, who had taken and, as was supposed, murdered six of the people of Ballasada. On the requisition of the Governor the people (who were yet alive) were restored, and war prevented. Ballasada has expressed his desire of removing with his tribe within the limits of the colony, and a tract of land has been assigned to him.

It has been observed, that this treaty may open commercial intercourse with the people around the sources of the Niger, and taken in connection with the fact, that treaties of the same general character have from time to time, been made with some thirty other kings, proves that, "however the colony may fall short of being what it should be, it has established among its neighbors, who have watched it for twenty years, such a reputation for superior intelligence, equity and good government, that they think their condition improved by placing themselves thus under its control."

Anxious to adopt every measure, which might conduce to diffuse ininformation and clicit aid from the churches of the country, in the month of April a circular letter was prepared, and distributed to the number of about eight thousand, among the ministers of nearly every religious denomination in the land. This letter was copied in several of the religious newspapers, and there is reason to think was read by a large portion of the people of the United States.

Public confidence in the cause has, the Committee are convinced, been revived and strengthened during the year in many parts of the Union. In the spring, the Massachusetts Colonization Society resolved, that vigorous efforts were demanded by the circumstances of the Society and colony, and in a public address recommended it to the regards of the churches and congregations of every name. The State Colonization Society of Connecticut, was re-organized at Hartford, in the month of May, and that of Delaware, about the same time. The Colonization Society of Vermont, still continues its aid to the cause, and in New Hampshire and Maine, are some of its most warm and devoted friends. The New York and Pennsylvania Societies, have continued to cherish zeal in the enterprize, though from various causes in the case of the former repeated disappointments in securing the services of a secretary and general agent,) their contributions have been less than in several former years. The Colonization Society of Indiana, and that of Missouri, have renewed their exertions, and Virginia retains for the scheme her early confidence and The Committee are assured that there is no abatement of attachment.

zeal in its behalf in Mississippi and Louisiana, though prevailing financial embarrassments in those States, and the want of an able agent, as in many other portions of the country, have prevented the usual amount of contributions to the parent society. In New England and some other sections of the Union, the cause of this Society has been assailed by every weapon which the subtlety and ingenuity of opponents could direct against it. So fierce and ungovernable has been the spirit of hostility, so disturbed has been the peace of ministers and churches, so extensively has suspicion been excited, and so many doubts thrown over the cause, that many intelligent and benevolent men have been led to pause and suspend their efforts for Unfortunate impressions, produced by slight and transient causes, and individual dissentions on the African coast, of the influence of the colonists upon the cause of missions, have diminished confidence and sympathy in churches and prevented collections for the Society. examination has re-established the merits of the cause in the minds of thousands, and made them its friends forever.

The committee have neglected no proper means of securing the services of able and judicious agents, but their endeavors have been attended with but partial success. In Pennsylvania, the Rev. J. B. Pinney, secretary and general agent of the Pennsylvania Society, has continued his earnest and useful labors, though various causes, especially the pecuniary embarrassments of the State, have rendered the collection of funds a work of toil and difficulty.

As secretary and general agent of the Massachusetts Society, the services of the Rev. Joseph Tracy, have been of great value, and his able writings have effectually contributed to diffuse information, correct errors, refute objections and strengthen confidence in the cause.

Mr. Franklin Knight was appointed early in the year to visit, as agent, various parts of Virginia, in the hope that a number of large unpaid subscriptions might be collected, and that a fund might be raised to enlarge by purchase, the Liberian territory. The pecuniary embarrassments in that State rendered it impossible to raise large sums of money, yet the faithful exertions of Mr. Knight, it is hoped, will not only result in the addition of a valuable amount to the funds of the society, but in awakening the minds of many to interest in the cause, and the formation of several anxiliary societies.

Rev. Samuel Cornelius, who had in previous years rendered very important service to the cause, has been earnestly engaged in advancing the interests of the Society in the State of Connecticut, and for a portion of the year in New Jersey.

Captain George Barker, who has long labored indefatigably and suc-

cessfully for the Institution, more particularly in the New England States, has continued his exertions in those States, and New York, principally in making collections and obtaining subscriptions to the African Repository.

The Rev. M. Wallace, of Ohio, and the Rev. Mr. Williams, of Kentucky, have made some efforts in their respective States during the year, and the Rev. Mr. M. Aston has recently been appointed for the State of Tennessee, but as yet, no intelligence is received of his movements.

While during the year a considerable amount of debt has been paid in the colony, and the pecuniary obligations of the Society been there reduced; yet the Committee regret to say, that owing to the failures of the usual resources from some of the most wealthy States of the Union, the full amount proposed to be raised at the last annual meeting, has not been The operations of the Society have thus been restricted and embarrassed, and the still remaining debt of the Society not materially diminished. The pecuniary difficulties of the country felt by all benevolent societies, and by almost every individual, the absence of the usual amount of aid from New York, Pennsylvania, Mississippi, and Louisiana, the too general neglect of ministers and churches, disposed to avoid agitated and controverted topics, to take up collections; the impossibility of obtaining able agents for certain districts of country, the obstacles thrown by the enemies of the Society in the way of those who have been employed, will afford an explanation of the financial condition of the Society. It should be added, that receipts from legacies have been smallor the last, than in several preceding years. Some bequests are still due the Society, but embarrassed by pending suits. It has been deemed expedient the last as in previous years, from motives of economy, in the necessary expenditures at the colony, to send a small stock of trade goods to the public store, and the returns have been as large as could be expected. By entering more largely into this commerce, could permanent arrangements be made, for securing regular intercourse by vessels under the control of the Society, between this country and the various settlements of the colony and other points on the coast, the Committee doubt not the means of the Institution might be much augmented.

From an extensive correspondence, and from intercourse with numerous individuals in various parts of the country, the Committee are well assured, that the limited income of the Society the last year, is not to be traced to a diminution of interest in the cause; but on the contrary, that the attachment of its friends every where is increasing, and that in more favorable times and circumstances they will extend to it that assistance which it merits and requires.

The difficulties which the colony has experienced from the interference of foreign traders, and the collisions and injuries to which it will be exposed, should any foreign Power establish itself on any portion of the coast to which its Government has pre-emptive rights, or so near in its vicinity as necessarily to restrain its advantages and restrict its growth, are subjects which have not escaped the consideration of the Committee. They have invoked the friendly interposition of our own Government to induce both the authorities of England and France to abstain from planting establishments on any portion of the coast from Cape Mount to Cape Palmas, but they are not informed of the results of the representations which they are assured have been made on behalf of the Society, through our ministers, to at least one of these Governments.

Near the close of the last session of Congress, Mr Kennedy, of the Committee on Commerce, to whom had been referred the memorial of the Colonization convention, held in this city in May, 1842, presented a very valuable report, which has since been printed by order of Congress, with a great variety of documents relating to the history of African Colonization, the slave-trade, the condition, climate, people, commercial and agricultural resources of Africa. This report says:

"It is vitally important that the territory of the colonies should be enlarged, and that their jurisdiction should become clear and incontestible over the whole line of coast between Cape Mount and Cape Palmas, a distance of about three hundred miles; and that in case of hostilities between this and any European country, their rights as neutrals, should be recognized and respected. The increase of legitimate commerce on the western coast of Africa is already strongly tempting the enterprize of English merchants, and serious difficulties have arisen between British traders claiming rights, independent of the governments of Liberia and Maryland within their territorial limits. Naval officers of Great Britain have been called on by British subjects to interpose and defend them against the revenue laws of the colonies; and the French, the committee are informed, have sought to obtain a cession of lands within the limits of Liberia just referred to, and to which the people of that colony have a pre-emptive right.

"As neither Great Britain nor any European Government, has to the knowledge of the committee claimed political jurisdiction from Cape Mount to Cape Palmas; as such calim if by possibility it exists, has arisen long since the colonies were founded; as those who occupy these settlements have gone thither to establish for themselves, their posterity, and multitudes who may follow them, a republican commenwealth, capable of indefinite enlargement, it is essential that they be not disturbed in the exercise of rights already acquired, or precluded from extending their authority over the entire line of coast, (from Cape Mount to Cape Palmas) generally known as Liberia. An appropriation of a few thousand dollars to enable the colonists to effect negotiations with the native chiefs, by which the native title to this region of Africa should be extinguished, and the jurisdiction of their Government over it rendered unquestionable, would in the judgment of your concattee, whether regarded as a measure auxiliary to the suppression of the slave-trade or to the interests of American commerce be highly expedient. In all treaties for the purchase of lands, it might be supulated that on the part of the African chiefs the

slave-trade should be forever abandoned, and their attention directed to the more gainful pursuits of agricultural industry, and to the exchange of the rich products of their country, for those of the manufacturing skill of this and other civilized nations. The people of the colonies, thus encouraged, would co-operate most effectively with our naval squadron in carrying out the humane and philanthropic purpose of the recent treaty, for the overthrow of the slave-trade, and become factors and agents to increase and extend American commerce in that quarter of the world. It is believed that \$20,000 thus expended would effect more for the furtherance of both these objects, than \$100,000 expended in any other way.

"The committee have abundant evidence, to which they refer in the documents accompanying this report, to show the increase of lawful commerce on the African coast, and that for want of adequate protection, and the due attention of our Government to the subject, it has been prosecuted by our own citizens under great disadvantages. To the testimony of Dr. James Hall, a gentleman entitled to full confidence, and who has resided long in Africa, the committee invite the special attention of the House. This testimony is confirmed by the information recently given to the world in the report and accompanying documents of a committee of the English House of Commons, appointed to inquire into the condition of the British settlements and their relations to the native tribes of Western Africa. The annual imports from Western Africa into this country probably exceed a million of dollars, and into Great Britain are about four millions. The palmoil trade now becoming of great value had hardly an existence twelve years ago, is rapidly increasing, and may be increased to an almost indefinite extent. Hitherto the slavetrade has been at war with all improvement and every kind of innocent commerce; its cessation will be succeeded by the cultivation of the soil, and the growth of trade in all the varied and valuable productions of the African elimate. It is of infinite importance that the natives of Africa should be convinced that agricultural labor, and the substitution of lawful trade for the infamous commerce in human beings, will be for their advantage, and that in their intercourse with them, our own merchants should possess every privilege granted to those of England, or any other nation.

"The establishment of a commercial agent, (as recommended by Dr. Hall,) to reside in Liberia, and occasionally to visit in a Government vessel, various points on the coast, to ascertain the best sites for mercantile establishments, to form conventions and treaties of commerce and for the suppression of the slave-trade with the principal chiefs, to take charge of the stores and other property sent out for our ships-of-war, to guard the rights and interests of our scamen, and secure for American vessels a free and unrestrained right of trade at all important stations, the committee would recommend as an object urgently demanded by interest and humanity.

"The time has arrived, in the opinion of the committee, when this subject of African Colonization has become sufficiently important to attract the attention of the people in its connection with the question of the political relations which these colonies are to hold with our Government. Founded partly by the private enterprize of American citizens, and partly by the aid of federal and state authorities, recognized as political communities by our laws, and even owing their regulation in some degree, to the legislation of a State of this Union, (as in the case of Maryland) they have attained a position in which, obviously, they must very soon become objects of consideration to the world, both for the commerce which may be under their control, and for the agency they are likely to exercise in the final disenthralment of the continent to which they belong. It may speedily become apparent to the observation of Christendom, that the slave-trade may more cer-

tainly, effectually and cheaply be destroyed by the colonial power on shore, than by all the squadrons of Europe and America adoat. The growth of such a conviction with inevitably draw an anxious and friendly eye towards the American colonies, from every power which sincerely pursues the charitable work of relieving Africa from her horrible traffic, and mankind from the reproach of permitting it. The influence of such a sentiment, we may conceive will greatly advance the interests and magnify the value of the colonies. It would appear to be our duty, before an occasion of conflicting interest may arise, to take such steps towards the recognition of our appropriate relations to these communities, as may hereafter secure to them the protection of this Government, and to our citizens the advantages of commercial intercourse with them."

The following resolutions are submitted at the close of this report.

e Resolved by the Senate and House of Representatives of the United States of America in Congress assembled. That the increasing importance of the colonies on the western coast of Africa, both in regard to the commerce of that coast and their influence in suppressing the slave-trade, renders it expedient that an agent should be appointed by the Government to protect and advance the interests of American trade in that region; that said agent should reside at some convenient point in the said colonies; and that he should be empowered to form treaties or conventions with the native tribes on the coast of Africa, for the advancement of American trade, and for the suppression of the traffic in slaves.

"And be it further resolved, That the subject of setting the political relations proper to be adopted and maintained between this Government and the colonies now established or which may hereafter be established, on the coast of Africa, by the citizens or public authorities of the United States, or any of the States, be referred to the Secretary of State, with a direction that he report thereon to the next Congress."

The committee cherish the hope, that some early and effectual measures in accordance with the general views of this report, will be adopted by Congress.

The value of this document, as a source of information on almost every topic connected with the enterprise of African Colonization, cannot well be over-estimated. The subject is now fully and fairly before the nation. Every consideration connected with the suppression of the slave trade, and the protection and advancement of our commerce on the African coast, the very objects, for which our squadron is there maintained, demands that a fostering care should be extended by the Government, to the colonies of Liberia. "Here," says Dr. Hall, "our Government finds ready at hand the very establishment which a sagacious statesman would have desired, a key of that vast continent, to unlock and open its treasures to our commerce, a foothold from which, with the least possible protection, we could not be dislodged. We have thus far realized all the advantages of colonial possessions without the expense of founding and supporting them. We have the material for extending and perpetuating colonies on the coast of Africa, not possessed by any other nation in the world; and why should all these advantages be sacrificed. Why should

we not at least, seek to retain what we already possess, when it can so easily be done."

The committee are gratified to observe, that the report of Mr. Kennedy has attracted much attention, and they are happy to conclude this report with a passage from an able and instructive article in the last number of the Biblical Repertory and Princeton Review.

"No idea," "says the writer, is dearer to them [the Liberians] than that of becoming an independent nation, and we acknowledge, that it is our earnest wish, that Liberia may never become dependent on any nation. Let it under providence, become a great and virtuous Republic. No nation, in its beginning ever had a brighter prospect before it. Let the American Government become the ally and protector of these colonies. Let them assist them, to complete the purchase of those portions of teritory, the title of which has not yet been acquired from the natives. Let them avail themselves of the advantages, which these colonies present, for prosecuting that valuable commerce, which is now opening to the world; and let them combine their efforts with those of other nations, in untiring efforts to suppress the slave trade, in which benevolent enterprise, they will find the Liberians their most efficient coadjutors. But Let LIBERIA FOREVER BE FREE. The greatest difficulties attending the establishment of a colony, are already overcome, and we do entertain the confident and pleasing expectation, that Liberia is destined to be a grand republic, which shall extend its benign influence into the very centre of the dark continent of Africa. And we do believe that it is the design of a wise and benignant providence to make Liberia the asylum of the whole African race, now dispersed over a large part of this continent, and the West India Islands. In our view, there is no spot on the globe better calculated to interest the Christian and philanthropist, than this little republic on the western coast of Africa. When the historian shall survey the events of the nineteenth century, we are of opinion, that his eye will fix with intense interest, on the bold, but benevolent enterprise, of colonizing the free people of color on the coast of Africa. And that such an enterprise should have been undertaken by a voluntary association, without the co-operation of the Government; and that it should have been successful, will be a subject of wonder to future ages. It is our sincere persuasion, that no event, which has occured in the world since the commencement of the nineteenth century, is at all equal in real importance to the successful establishment of this little colony. We do not think, that the history of the world can furnish a parallel to the accomplishment of this work, by voluntary association of benevolent men."

The committee will add only, that however wide and fair a prospect is opened by this enterprise to the eve of philanthropy, however great the wisdom and sagacity that devised it, or the benevolence and piety of those who in the service of the Society have sacrificed their lives on the coast of Africa, none deserve higher praise than those men of color who have engaged in it with an unconquerable resolution, determined at all hazards to lift the covering of night and barbarism from the African mind, to re-kindle the extinguished hopes, and re-build the broken fortunes of their race.

PROCEEDINGS OF THE BOARD OF DIRECTORS

OF THE AMERICAN COLONIZATION SOCIETY, AT THEIR ANNUAL METTING.

Washington City, January 17, 1814.

The Board of Directors of the American Colonization Society met. Present—

Rev. C. C. Cuyler, D. D., P. T. Jones, Esq., Rev. A. D. Gillett, Delegates from the Pennsylvania Colonization Society—A. G. Phelps, Esq., New York Colonization Society—Rev. Joseph Tracy, Massachusetts Colonization Society—Rev. Elias Harrison, Rev. John Davis, District of Columbia Colonization Society—Elliott Cresson, Esq., Life Director—Rev. R. R. Gurley, W. McLain, M. St. C. Clarke, Esq., H. L. Ellsworth, Esq., Members Executive Committee.

Rev. Dr. Cuyler was called to the chair, and the Rev. W. McLain was appointed Secretary.

The minutes of the last Annual Meeting were read.

On motion of the Rev. Joseph Tracy, it was

Resolved, That the Annual Report be taken up, and so much thereof as relates to the state of the colony be referred to a committee; and that so much thereof as relates to the state of the cause in this country be referred to another committee, each committee to consist of three members.

Whereupon the Chairman appointed Messrs. Tracy, Gillett, and Davis, a committee on the state of the cause in this country; and

Messrs, Cresson, Harrison, and Jones, on the state of the Colony.

The Rev. R. R. Gurley offered the following resolutions, viz:

- 1. Resolved, That a committee be appointed to consider the financial interests of the Society, and by what means the income of the Society may be increased.
- 2. Resolved, That a committee be appointed to consider what, if any, further measures should be adopted to increase the confidence of all the friends of missions, and to scenie their aid to the cause.
- 3. Revolved, That a committee be appointed to consider what, if any, further measures should be adopted to secure aid from the General and State Governments, and also to secure a friendly recognition by foreign powers of the rights and interests of Liberia.
- 4. Resolved, That a committee be appointed to consider whether any and what measures should be adopted to secure some increased advantages from trade with the Colony; and, also, whether and what arrangements should be made to establish a regular line of packets, to sail at least twice a year at certain times for the Colony.

On motion of the Rev. W. McLain, the first and third of these resolutions were referred to the committee appointed on the state of the cause in this country, and the second and fourth to the committee on the present state of the colony.

On motion, it was resolved, that James Hall, M. D., Secretary of the Maryland Colonization Society, be invited to sit with the Board as a corresponding member.

Messrs. Paul T. Jones and A. G. Phelps, were appointed a committee to examine the Treasurer's account, and the financial transactions of the Executive Committee.

On motion of Mr. Jones, it was resolved, that a committee of three be appointed to examine the records of the Executive Committee for the past year, and report during the meeting of the Board.

Messrs. Cuyler. Tracy, and Davis, were appointed said committee.

Adjourned to meet at 7 o'clock this evening.

The Board met agreeably to adjournment. Present, as in the morning, with the addition of Hon. H. A. Wise, Delegate from the Virginia Colonization Society; Hon. John Stewart, Delegate from the Connecticut State Colonization Society; Hon. Joseph Vance, Delegate from the Ohio State Colonization Society; Hon. J. Huntington, Delegate Connecticut Colonization Society.

The Rev. Joseph Tracy, from the committee on the state of the colony, made the following report:

"The Committee to whom was referred so much of the Annual Report as relates to the condition of the colony, beg leave to report:—

"That the affairs of the colony and of the society with respect to it, appear to have been conducted on correct principles, and with as much success as it was reasonable to expect. The distance of the colony from the directing power at home, and the consequent necessity of acting often on imperfect information, both here and there; the influence of the disadvantageous position of the colonists, before emigration, on their mental culture and habits of thought and action, and the adverse influences, both African and European, with which they have had to contend in their new abode, are formidable obstacles; and the degree in which these obstacles have been overcome in the short space of about twenty years, encourages the most cheering hopes for future ages.

"The Committee notice, with peculiar gratification, the provision made by law, for a system of Common Schools, intended to meet the wants of the whole colonial population. Where a State fails to provide for the instruction of its youth, it is well for private enterprize or liberality, or associated benevolence, to step in and supply the deficiency; and perhaps this

can be done in no better way than by the action of churches. tain, however, that a system devised and executed by the public authorities of a Christian people, can be more efficient in reaching the whole population, in teaching throughly the rudiments of knowledge, and in forming correct moral habits, than any system which depends on the will of a few, and which is not armed with the power of the State. While, therefore, we would sincerely thank those "religious institutions in America," who have done so much for education in the colony, and would earnestly request their continued aid, so long and to such extent as may be necessary, we would also express the earnest hope, that the colonists will effectually take the work into their own hands, and soon render their system of education independent of charitable aid. In this attempts all depends, as it ought, on the several school districts. Let them first tax themselves liberally and then see to it that their money is well expended, and the work is done.

The Committee are gratified to learn, that the commerce of the colony is prosperous, and that agriculture is receiving increased attention. Agriculture ought certainly to be the business of the great body of the people, and should be so conducted, that, as far as practicable, each shall produce on his own farm, whatever is necessary to sustain life with comfort. By pursuing such a course, the farmer secures himself against being reduced to want in a single year, by the failure of a single kind of crop, or by a change of its price in the market. He secures that noblest boast of his calling, independence; and he takes the surest, though not the most flattering, road to wealth.

In respect to both agriculture and commerce, the Committee regret the want of more full and definite statistics. The circumstances of the ease go far to excuse this deficit hitherto. We hope, however, that returns from the colony will hereafter be such as to furnish the desired information.

"The Constitution and Laws of Liberia, the Committee have not been able to examine in detail. The fact, however, that such a volume, sanctioned by an African Legislature, has issued from an African press, ought to give joy to the civilized world.

"The relations existing between Liberia and the neighboring tribes, is highly gratifying, and cannot fail to be mutually beneficial. The population of the allied tribes, before the late treaty with the Golahs, has been estimated at 60,000. Yando, head King of the Golahs, boasted that he had 50,000 subjects. His residence is supposed to be 80 or 100 miles from the coast, and his country to extend to a considerable distance beyond. After all due allowance for exaggerations, we may safely suppose

that these treaties cover an extent of 100 miles inland, and embrace nearly 100,000 natives. Among all these, war and the slave trade are abolished, much of barbarism and of cruel and degrading superstition has been removed, and civilization and Christianity are making progress. They are brought, or rather, having watched and considered the subject for twenty years and become convinced of its advantages, they have sought and obtained admittance, into habitual and friendly intercourse with civilized and Christian men, in the hope and for the sake of learning to be like them. And more than this: they think themselves gainers by surrendering some part of their national independence, and placing themselves, in some important respects, under the control of their Christian neighbors, The influence of these relations on the diffusion of Christianity cannot be doubtful.

"This seems to be the proper place for considering, as the Committee were directed, "what, if any, further measures should be adopted to increase the confidence of the friends of missions, and to secure their aid to the cause." What can be necessary, more than a fair and full statement of the facts in the case? Indeed, that confidence, which was certainly somewhat impaired for a little while, seems to be reviving; as, with one exception, every society which has ministers there, is strengthening and enlarging them. Of that one exception, the mission of the American Board at Cape Palmas, it might be sufficient to say that it is not within the limits of our Colony, and we are no more responsible for its history than if it had been at the Cape of Good Hope. But we choose to add another answer.

"That mission was commenced with the intention of making Cape Palmas, not the principal field of its labor, but a mere stepping stone, from which to reach some part of Central Africa. There was then no other mission there. The Board was urged to embrace the Colonists, as well as the natives, in the field of its labors; but being chartered for the specific purpose of missions to the heathen, thought itself restrained from sending missions to Christian Colonists. It was the policy of the colony to amalgamate the interests of the natives with their own. The policy of the mission, then almost as strong as the colony, and expending all its labors for the benefit of the natives, naturally tended to raise up a native interest, distinct from the Colonial. This was the true root of the difficulty. the unpleasant collisions of the missions of that Board with the Colony, are to be traced ultimately to this source. The two communities were not well constituted for working together in a feeble colony, and in a district of small extent. It is within the knowledge of your Committee, that some of the principal officers of the American Board became convinced of this, and feared that if present difficulties were settled, others would arise from

the same cause. Meanwhile two other missions had been planted there, and three missions could not be expected to labor permanently in such close contiguity, without collision with each other. Meanwhile, also, an opening was found at the Gaboon river, a thousand miles nearer the point which the mission was intended to reach. It was occupied, and soon found so favorable, that the Board resolved to remove its whole establishment to that place. In all, this, there is nothing to prove that missions, conducted on a plan adapted to the state of the country, cannot flourish, even at Cape Palmas; while the increase of other missions, there, proves that they can.

It is said by some, that the colonies are prejudicial to missions, because the example of irreligious colonists corrupts the natives; but such objectors surely cannot know what the natives were before they felt the elevating influence of the colony. Blind adherents of the most degrading idolatry, polygamists, kidnappers, and some of them cannibals from time immemorial, and having been for nearly three centuries under the exclusive tuition of European slave traders and pirates from whom they had thoroughly learned all the vices of civilization which savages are capable of learning, they were incapable of being demoralized. Numerous attempts were made to plant missions among them, and every one failed. sides all this, the treaties before alluded to show conclusively, that notwithstanding the bad examples of some colonists, which are not so bad as the slave-trading specimens of Christianity which the colony has driven away, the natives know that the Christian system is better than theirs, and produces a better state of society; and therefore the balance of influence is immensely in its favor.

The resolution concerning the increase of trade and the establishment of packets, the committee have not had time to consider.

Respectfully submitted for the committee.

JOSEPH TRACY,

Chairman.

On motion of Paul T. Jones, Esq., the report was accepted.

On motion of the Rev. J. B. Pinney, the report was adopted.

Elliott Cresson, Esq., from the committee on the present state of the cause in this country, made a report, which,

On motion of Mr. Tracy, was accepted; and, after some amendments was laid on the table; (and at the close of the proceedings was again taken up, further amended and adopted, and will be found in its proper place.)

On motion of Mr. Jonns, the Board adjourned to meet at 11 o'clock te-morrow morning.

January 18, 1844.

The Board met agreeably to adjournment. The minutes of the meeting yesterday morning were read and approved.

The committee appointed to examine the Treasurer's account, and the financial transactions of the Executive Committee, made the following report:—See account current for 1843.

On motion of Rev. John Davis, this report was accepted and adopted. On motion of Mr. Davis, the Board adjourned to meet at 5 o'clock this evening.

5 o'clock, P. M.

The Board met agreeably to adjournment. The minutes of the morning's session were read and approved.

 D_R , $C_{\Gamma YLER}$, Chairman of the Committee on the records of the Executive Committee made the following Report:

- "The committee on the records of the Executive Committee, beg leave to report:
- "That those records show that the duties of the executive committee have been numerous, difficult and important, and have been performed with a degree of industry, fidelity and intelligence, for which that committee well deserve our thanks. Time has not allowed us in all cases to examine the grounds of their decisions, so as to give an opinion of their correctness; but we have noticed nothing which appears to demand a re-examination or revisal.
- "We would suggest the inquiry, whether there may not be, during the year now commencing, a more extensive and effectual presentation of the claims of this society before public bodies, both legislative and eclesiastical, and indeed, before the whole country. The details of the plan of operations for this purpose, must of course be arranged from time to time by the executive committee. Much may be done by correspondence; and the Secretary and Treasurer, and other suitable agents, if such can be found, may attend important meetings, visit influential individuals, and impart information, courage and activity to our friends in various parts of the country.
 - "Respectfully submitted, in behalf of the committee.

"COR'S C. CUYLER, Chairman."

On motion of Mr. J. B. Pinney, this report was accepted.

Hon, W. C. Rivers, appeared and took his seat as a Delegate from the Virginia State Colonization Society.

Hon. R. C. Schrinck, appeared as a Delegate from the Ohio State Colomzation Society and took his seat.

On motion of Mr. Jones the report was adopted.

On motion of Mr. Phelps, the Board adjourned to attend the public meeting in the Capitol, and to meet again to-morrow morning at 10 o'clock.

January 19, 1811.

The Board met. Present Messrs, Cuyler, Phelps, Harrison, Davis, Rives, Cresson, Tracy, Jones, Gillett, Stewart, Clark, Ellsworth, Gurley, and McLain.

The minutes of the evening session were read and approved.

On motion of Mr. Jones, it was resolved that we now go into an election of members of the Executive Committee.

On motion of Mr. Stewart, it was resolved that a Committee of three be appointed to make a nomination.

Messrs. Gillett, Tracy and Davis, were appointed said Committee.

Mr. Gillett, from the above Committee made a report.

"The committee appointed to nominate members of the Executive Committee, beg leave to report the following names, viz:

"Hon. H. L. Ellsworth, Hon. M. St. Clair Clarke, Hon. W. W. Seaton, H. Lindsly, M. D., Hon. C. B. Penrose, Hon. A. O. Dayton, Rev. C. B. Davis,

"A. D. GILLETT, Chairman."

On motion of Mr. Stewart, this report was laid on the table.

And, on motion of Mr. Phelps it was resolved, that it is expedient for the Board to elect a Corresponding Secretary of the Society.

On motion of Mr. Stewart, it was resolved that the Board now proceed to the election of Corresponding Secretary.

Whereupon, the Rev. R. R. Gurley was elected.

On motion of Mr. Jones, the report of the Committee on nomination of members, of the Executive Committeee was taken up, and on motion of the same, it was adopted.

After which Mr. Gurley, formally tendered his resignation of the office of Corresponding Secretary, and expressed his good feelings for the cause and his fervent wishes for its future prosperity.

On motion of Mr. Phelps, it was resolved that, the resignation of Mr. Gurley be accepted.

And, on motion of Mr. Phelps, it was resolved that the thanks of this Board are due, and are heartly tendered, to our late Corresponding Secretary, Rev. R. R. Gurley, for his long continued and valuable services, and and that while, in the kind wishes for the prosperity of the cause, and good feelings toward the members of the Board, expressed by him in resigning his office, we find assurance of his future friendly influence, we

assure him that this Board and its individual members reciprocate the feelings and that our good wishes will follow him in subsequent life.

On motion of Mr. Tracy, it was resolved that we proceed to the election of a Corresponding Secretary.

Whereupon, Rev. W. McLain was unanimously elected.

On motion of Mr. Pinney, it was resolved that Executive Committee be authorized to appoint a Treasurer of the Society.

On motion of Mr. Phelps, the report of the Committee on that part of the Annual Report, relating to the state of the cause in this country was taken up, amended, and adopted and is as follows:

- "The committee appointed on that part of the Annual Report, which relates to the state of the cause in this country, beg leave to report:
- "That in relation to the financial interests of the Society, the committee, in view of the reduced state of our income, feel assured of the imperative necessity of strict economy in the expenses at the seat of Government, and therefore recommend their immediate reduction, to a sum not exceeding \$2000, per an., viz:

···For Corresp	oonding Sec	retary	-	-	-	-	\$1500
· Rent		-	-	-	-	-	200
" Office expenses -		-	-	-	-	-	300
							\$2000

- "With this evidence of a determination to make an economical disbursement of the funds intrusted to our care, we believe that men of a high order of usefulness may be obtained, to advocate the claims of the American Colomzation Society, and to swell the amount of its funds. It is only by rendering the cause popular and securing the love of the citizens at large, that we can hope to operate successfully upon our republican government, which always follows, and never leads public sentiment and action. Meanwhile, we shall be happy that the local and State societies, should invoke the co-operation of the individual State Governments, and recommend this course of action.
 - " All of which is respectfully submitted,

ELLIOT D. CRESSON, PAUL T. JONES."

Oh motion the Annual Report was referred to, the Executive Committee for publication.

And, on motion of Mr. Jones, the Board adjourned, to meet on the third Tuesday of January, 1845.

PROCEEDINGS OF THE ANNUAL MEETING

OF THE AMERICAN COLONIZATION SOCIETY,

The Twenty-seventu Annual Menting of the American Colonization Society was held in the Capitol on Tuesday evening, the 16th ult., when the Hon. John C. Herbert, the first on the list of Vice Presidents took the chair.

Prayer was offered by the Rev. Dr. Laurie. The Report of the Excentive Committee of the Society was read by the Secretary, Mr. Gurley.

On motion of the Rev. R. T. Berry, the following resolution was adopted:

Resolved. That the Report of the Executive Committee just presented, be accepted and referred for consideration and publication to the Board of Directors.

On motion of the Rev. C. M. Butler,

Resolved. That in view of the past success and present prospects of the American Colonization Society, its friends are called upon to exert cheerful and continued efforts in its behalf; and that in the vigorous prosecution of the plan of African Colonization, is to be found the best means of arresting the slave trade, and of preparing a way for and promoting the cause of Christian missions in Africa.

On motion of the Hon. J. R. Ingersoll,

Resolved. That in the opinion of this meeting, the friends of this Society in every part of the Union, should more and more appreciate the grandeur of their enterprize, as involving very materially in its ultimate consequences the dearest interests of two races of men, in two of the largest quarters of the globe.

On motion of the Rev. Dr. Cuyler,

Resolved. That in the decease of the venerable Dr. Proudfit, a Vice President of this Society, and long the devoted and efficient Secretary of the New York Colonization Society, this Institution has sustained a heavy loss, and that the memory of this eminent Christian philanthropist will ever be cherished by the members of this Institution, and by all the friends of Africa.

On motion of the Rev. J. B. Pinney,

Resolved, That in the judgment of this meeting, the advances of the Colony of Liberia in agriculture, commerce, and other public improvements has equalled all reasonable expectations; and that, although the progress of such improvements in such a colony, is at first necessarily slow, they have already been such as to demonstrate the general industry and enterprize of the people, and the vast resources of the country.

On motion of the Rev. J. N. Danforth,

Resolved. That the moral, civilizing and Christian influence exerted by the people of Liberra over many African tribes, and the earnest efforts of its ministers of the gospel, and many of its cruzens to enlighten the minds of the neighboring heathen with the great truths of Christianity, should excite the sympathies and confidence of all the friends of missions, and induce the clergy and churches of every name to extend to this colony a more constant and liberal support.

On motion of M. St. Clair Clark,

Resolved, That this Society will cherish an affectionate remembrance of the Hor, William II dsey, for several years very earnestly and successfully engaged in the promotion of the cause of African Colonization in the State of New Jersey.

On motion of the Hon, Mr. Morchead, it was

Resolved. That the Society hold another public meeting in this hall on Thursday evening the 18th inst,

After which the Society adjourned to meet in the Colonization Office at 10 o'clock, A. M. to-morrow.

At a meeting of the Society, at the office of the same on Wednesday morning the 17th at 10 o'clock, the Hon. L. Q. C. Elmer, one of the Vice Presidents, took the chair.

The Secretary, Mr. Gurley, moved the appointment of a committee to nominate the President and Vice Presidents of the Society.

The following gentlemen were appointed on the committee: Messrs. A. G. Phelps, Pinney, Jones, Tracy, and Davis.

Mr. Phelps, from the committee, after retiring for a short time, made the following nomination which was approved:

Honorable HENRY CLAY, President.

Vice Presidents.

- 1 John C. Herbert, of Maryland,
- 2 General John H. Cocke, of Virginia,
- 3 Daniel Webster, of Massachusetts,
- 4 Charles F. Mercer, Florida,
- 5 Rev. Jeremiah Day, D. D., of Conn.,
- 6 John Cotton Smith, of Connecticut,
- 7 Theodore Frelinghuysen, of New York,
- 8 Louis McLane, of Baltimore,
- 9 Moses Allen, of New York,
- 10 General W. Jones, of Washington,
- 11 Samuel H. Smith, of Washington,
- 12 Joseph Gales, of Washington,
- 13 Right Rev. Wm. Meade, D. D., Bishop of Virginia.
- 14 Alexander Porter, of Louisiana,
- 15 John McDonogh, of Louisiana,
- 16 Geo. Washington Lafavette, of France,
- 17 Rev. James O. Andrew, Bishop of the Methodist Episcopal Church,
- 18 William Maxwell, of Virginia,
- 19 Elisha Whittlesey, of Ohio, 20 Walter Lowrie, of New York,

- 21 Jacob Burnett, of Ohio, 22 Joshua Darling, of New Hampshire,
- 23 Dr. Stephen Duncan, of Mississippi,
- 24 William C. Rives, of Virginia,
- 25 Rev. J. Laurie, D. D., of Washington,
- 26 Rev. Wm. Hawley, of Washington,
- 27 Rev. Wm. Winans, of Mississippi,
- 28 James Boorman, of New York City,
- 29 Henry A. Foster, of New York,
- 30 Dr. John Ker, of Mississippi,
- 31 Robert Campbell, of Georgia,
- 32 Peter D. Vroom, of New Jersey,

- 33 James Garland, of Virginia,
 - 31 Rev. Thomas Morris, Bishop of the M. E. Church, Ohio,
 - 35 Rt. Hon. Lord Bexley, of London,
 - 36 Wm. Short, of Philadelphia,
 - 37 Willard Hall, of Delaware,
 - 38 Rt. Rev. Bishop Otev, of Tenn.
 - 39 Gerald Ralston, of London.
 - 40 Rev. Courtland Van Ransselaer, N. J.,
 - 41 Dr. Hodgkin, of London,
 - 42 Rev. E. Burgess, D. D., of Dedham, Massachusetts,
 - 43 Thos. R. Hazard, of Providence, R. I.,
 - 44 Dr. Thos. Masssie, of Tye River Mills, Virginia,
 - 45 Gen. Alexander Brown, of Virginia,
 - 46 Maj. Gen. Winfield Scott, Washington,
 - 47 Rev. Thos. E. Bond, D. D., N. York,
 - 48 Rev. A. Alexander, D. D., N. J.,
 - 49 Samuel Wilkeson, of New York,
 - 50 A. P. Upshur, of Washington,51 L. Q. C. Elmer, of New Jersey,
- 52 James Railey, of Mississippi,
- 53 Rev. George W. Bethune, D. D., of Philadelphia,
- 54 Rev. C. C. Cuyler, D. D., of Phila.,
- 55 Elliot Cresson, Esq., of Phila.,
- 56 Anson G. Phelps, Esq., New York,
- 57 Rev. Leonard Woods, D. D., Andover, Massachusetts.
- 58 Jonathan Hyde, Esq., Bath, Maine,
- 59 Rev. J. P. Durbin, D. D., Carlisle, Pa.,
- 60 Rev. Beverley Waugh, Bishop of M. E. Church, Baltimore.

Mr. Gurley rose and spoke of the long continued and important services of Col. W. L. Stone, and moved that he also be appointed a Vice President, which motion was adotped.—Rev. J. B. Pinney rose and offered the following preamble and resolution.

WHEREAS. In the origin of the Colonization scheme, the aid and protection of the General Government was expected to be extended to the Colonies-And,

WHEREAS. The work of extending, governing and providing for their interests, has grown a really beyond the means of voluntary association-And,

WHEREAS. The present interests and future welfare of the Colonics in Africa, need

the fostering care of some friendly State; an I, Whereas, by reason of Constitutional and other obstacles, such care and protection has not been obtained from the Government of the United States, and is not likely to be extended. Therefore,

Resolved. That a committee of three be appointed to consider the wisdom and propriety of ceding said colonies to some European power—or of securing their fitendly protection for the colonies, and also to report the measure proper for such action.

This resolution, after some discussion in which Messrs. Pinney, Tracy, Cuyler, and Gurley, participated, was, on motion of Dr. Cuyler, referred over for consideration to the Board of Directors. After some further remarks from Messrs. Harrison, Cresson, and Gurley, on motion of the Rev. Mr. McLain, a committee was appointed by the Chairman to make arrangements for the public meeting to be held to-morrow evening at the Capitol, consisting of Messrs. Cresson, Harrison, and McLain.

The Society then adjourned until to-morrow evening at 7 o'clock.

Hofse of Representatives, Jan. 8th, 1844.

The Society met agreeably to adjournment. The Rev. Dr. Laurie, one of the Vice Presidents, took the chair. The minutes of the preceding meetings were read.

The Hon. Mr. Morehead presented and ably advocated the following resolutions, which were adopted.

Resolved. That since the colony of Liberia is powerfully contributing to the suppression of the African slave-trade, and the protection and increase of American commerce on the African coast, as well as to the cause of African civilization, it be recommended to the Board of Directors and to the several State Colonization Societies to continue their applications to the general government, for such aid, by the direct appropriation of funds, and the co-operation of the United States squadron on that coast, as shall enable the Colony of Liberia to acquire entire jurisdiction over the whole line of that coast from Cape Mount to Cape Palmas.

Resolved. That in view of the vast benefits to mankind of the enterprize in which the Colonization. Society is now engaged of planting a colony of colored freemen, on the coast of Africa, it is incumbent on the people of the United States to give to that Society a cordial and efficient support.

Elliot Cresson, Esq., addressed the meeting on the vast objects contemplated by the Society, and the advantage which the agricultural and manufacturing interests of this country would derive from their vigorous prosecution.

The Rev. Mr. Gillett offered and advocated the following resolution which was adopted,

Whenevs, The Colonization Society belongs to no party in politics, to no one denomination of Christians, and to no one section of our beloved country.—Therefore,

R solved. That it is the duty of all philanthropists to promote its civil and educational prosperity, and of all churches to co-operate with its religious inhabitants in spreading among them and the contiguous native tribes, the glorious gospel of the blessed God.

On motion of the Rev. Mr. Tinsley, the Rev. Dr. W. B. Johnson, of South Carolina, was added to the list of Vice Presidents of the Society.

Paul J. Jones, Esq., addressed the meeting on the importance of inercessing the contributions to the Society, and extending its operations both in this country and in Africa.

After which the Society adjourned to meet again on the third Tuesday of January, 1845,

(C.

The undersigned committee appointed to audit the accounts of the treasurer and executive committee, from Jan. 1, 1843, to Dec. 31, 1543, have performed the duty assigned them, and find the above statement correct.

Washington, Jan. 17, 1844. N. B. From the above statement.

A. G. PHELPS, PAUL T. JONES. N. B. From the above statement, it will be seen that the exact amount of the receipts of the Society during the year 1843, was \$32,191 61. From the Maryland Colonization Journal.

OUR "AFRICAN SQUADRONS."

Ir is well known that by the eighth article of the Treaty of Washington, the United States Government stipulated to maintain a naval force on the West Coast of Africa, of not less than eighty guns, to co-operate with the British squadron on that coast in the suppression of the slave trade. The causes too, which led to the adoption of this article are generally well Like the settlement of the north-eastern boundary, the points of controversy arising out of the questions of right of search, of visitation, and the abuse of these rights, were laid aside, and a compromise effected in the terms of the treaty. And although the arrangement was unexpected by all, and unsatisfactory to many, yet we believe it is generally conceded that the measure was a most judicious one, and the most honorable way of avoiding international difficulties. The British goverument plainly saw that without the right of search or visitation, or (laving aside terms) without the right of ascertaining the true character and nationality of all vessels on the coast of Africa, all their efforts, their immense outlay of treasure, and sacrifice of life in their extended attempts to abolish the slave trade must prove abortive, yea, worse than abortive, as they did not lessen the number shipped, but merely exposed the victims of the traffic to increased sufferings and torture. She felt, therefore, that her claims on this point, (claims too, which have ever been granted by courtesy on the high seas between friendly powers for the suppression of piracy, which the slave trade has been declared by the United States government) were but reasonable and ought to be complied with. She asked too, only what she was willing to grant in turn. On the other hand, the people of the United States justly felt jealous of granting to the British Government a right or privilege which bore a strong affinity, in name at least, to one formerly claimed by that power and which we had spent our blood in resisting. They too, well knew that the exercise of this very power, or right of visit, which had for the few past years been permitted on that coast as a matter of courtesy, had been grossly abused by officers of the British navy, and that the regular American traders even to English settlements, with all evidences of nationality and lawful traffic on board, had been seized and adjudicated in the "court of mixed commissions," in a British port, and confiscated. The position of the parties, therefore, was such that for either to persist in its demands would be incompatible with a continuation of friendly nations. Great Britain readily received the acquisition of eighty guns to assist in the suppression of the slave trade in lieu of the "right of visitation" of suspected vessels bearing the American flag, and the American government, while it felt bound in honor and principle to refuse this concession, could not do less than grant a show of assistance in suppressing a traffic which she had long since denounced as piracy on the high seas.

Thus, whatever may have been the ostensible or avowed object in the establishment of our squadron on the African coast, or whatever may be its consequences or results, it cannot be denied that it was done rather as a matter of compromise than principle, rather to allow England to suppress the slave trade than with a view of doing much ourselves. In proof of this, it is only sufficient to say, that the state of things which now requires a squadron there has existed for the past twenty years.

But no matter what may have been the immediate causes which led to the adoption of this measure, inasmuch as it has been adopted, and must be continued during the period of five years from the date of the treaty, it certainly is the duty of our government to reap all possible benefits therefrom, and to make it in all practicable ways available to the interests of American citizens. It has often been alleged (but we think unjustly) that the measures taken by the English government for the suppression of the slave trade, are rather adopted for the purposes of proteeting their commerce on that coast and extending their sway over the interior, thereby creating a vast market for their manufactured exports. That this is a secondary object, and a justly important and praiseworthy one too, cannot be doubted, and that government has managed the matter with much credit to itself and advantage not only to her citizens but to the native Africans. The suppression of the slave trade, the civilization of Africa, the protection of her commerce and the furnishing a market for the products of the industry of her own citizens, go hand-in-hand, are all alike, objects of interests to that government, and are advanced by the same measures. By her navy she cleares that coast of pirates and freebooters; she forms treaties of commerce with unfrequented tribes and enforces from them just and honest intercourse with her merchantmen; she seizes the freighted slave ship and transports its wretched victims to her colonies and trains them up as "British subjects." By her colonies planted at the entrance of the great rivers and prominent points of that coast, she secures all trade, so far as their influence extends, to the virtual exclusion of vessels of all other nations. These, too, furnish depots for merchandise for coast trade and transhipment, places of relief for disabled vessels and sick and distressed seamen, and points from which civilization and British influence spreads in all directions.

But, up to this period, what has the American government done? Nothing And now that a squadron has been sent out—that appropriations have been made for the purpose, that the attention of the government and the American people has been directed towards Africa, we might almost give the same answer to the same interrogatory. On the ground that the first object of the squadron is the suppression of the slave trade, we would ask how are the measures in process calculated to effect this object? Why, so far as we understand it, in the least manner possible, with the fulfilment of the letter of the treaty. In the first place with regard to the character of the vessels despatched to that station. recent Report of the Secretary of the Navy says, the cruising ground of our squadron extends from the "Madeira and Canary Islands to the Bight of Bratira, and from the African coast to the thirtieth degree of west longitude," a distance of coast line, independent of breadth or longitude, of near three thousand miles. It is well known that of late years, with barely two exceptions, all vessels known to be engaged in the slave trade, have depended altogether upon their speed, or swiftness, to enable them to escape molestation from cruisers. Now with such an extent of cruising ground where little or no defence on part of the slaver is to be expected or can be made, it must be obvious that next to sending out an eighty gun ship, thereby fulfilling the letter of the treaty, our vessels at present on that station are of the least possible utility, the squadron consisting of one frigate, two sloops of war and a brig. Of the sailing qualities of these vessels, excepting the brig Porpoise, we know nothing, but we never saw a slaver on that coast that would run the least risk in taking off slaves in sight of her In order to insure any degree of success in arresting the slave trade by our eighty gun squadron, it should be composed of the smallest sized vessels in the service, with but one long gun amidships and a complement not exceeding thirty men all told.

With regard to their station and cruising grounds. This is so extended and needlessly too, that the squadron of four vessels absolutely becomes lost in it. Nobody ever heard of a slaver to the windward of Cape Verd in prosecution of the traffic. Madeira, the Canaries or the Cape de Verd Islands, doubtless afford more agrecable stopping places to the officers and men than are to be found on the coast, but never a slaver. At Bissaos in the Rio Grand, the slave trade commences, and occasional factories exist along the coast as far down as New Cesters, a distance of some five hundred miles. From New Cesters there is not a slave factory for near one thousand miles of coast line, including a part of the Grain Coast, Ivory and Gold Coasts, and the European forts, to Whydah. they again commence and continue across the line, occupying all the great outlets of the Niger and other rivers. In order therefore to operate with any effect upon this trade, the cruising should be confined to those parts of the coast in which it is earried on. The only possible chance of securing a slaver by a sailing vessel, is to watch the factories themselves, to lie off and on until one heaves in sight and then give chase. The slaves must be shipped from the factories or their vicinity, and if close watch is

kept the carrying vessels can often be secured.

But there is another important object to be effected by the African squadron, and one too which must be presumed the executive had in view in the formation of the treaty, viz: the advancement and protection of the American commerce with Africa. And the question at once arises: how can this object best be effected? We answer, in two ways; first, directly, by the formation of treaties of commerce with the more important native tribes on different sections of the coast, through their kings and head trade men: and secondly, indirectly, by affording aid to the American colonies already established there. What instructions have been given to the commandant on that station with regard to advancing our commercial interests there, or of forming treaties of commerce with the native chiefs, if any, we cannot say: but certainly there never occurred a more favorable opportunity of effecting a great and permanent good to our country. It is well known that the African continent is one of the most valuable and productive in the world, that her natural resources are unequalled by any other, and that she has a population abundantly able with proper inducements to develop them. It is well known, too, that at this time the great commercial nations of Europe are striving for precedence in the acquisition of the commerce of this continent. It is known, too, that the greatest article of traffic with Africa can be procured only in the United States, viz: tobiceo; and that heavy cottons, gunpowder and spirits, the next in importance in order, we can compete with any European country in manufacturing and exporting. With such advantages for such a commerce, and with our present facilities for securing it, ought not some arrangements to be made at this time to place it on a safe and permitnent footing cre it is too late? Unless something is done we predict that

twenty years hence there will not be a river, bay or canoe landing of consequence on the coast of Africa open to the free entrance of an American bottom. The first step to be taken is to form treaties of commerce with the name chiefs on all parts of the coast not now claimed by European governments. A permanency could be given to such treaties by the purchase of a small point of land, which would afford a safe boat or canoe landing. This spot need not be protected or defended, the bare purchase and cession would prevent an ultimate transfer of the whole to some European power. This would ever secure to our merchantmen a right of trade of which they could not be dispossessed except by open force. this is not done we shall soon learn that such and such a section of the coast has passed into the hands of the English, French, German or Danish governments, that a colony is established at such a point, and no foreign vessel is allowed to trade with the natives, or even to enter any goods or merchandise which will in any degree conflict with the interests of the commerce of the nation thus occupying, as is the case now at the French settlements of Senegal and Goree, the British of Gambia and Sierre Leone, the Dutch at Elmina and Acera, and in fact at all the European settlements on the coast.

But, in addition to this, our commerce needs the protection of American vessels of war, protection both from pirates and the more barbarous tribes with whom we traffic. We not only require their protection from violence but in enforcing the fulfilment of contracts. The system of trade on the most important marts, as in the great rivers in the Bights of Benin and Biaffra, is such that aid of this kind is absolutely necessary to its successful prosecution. In the first place on the arrival of a vessel say of three hundred tons burthen, a dash or present, called comey, is exacted by the chiefs of the country of not less than one thousand dollars in value, before any trade palaver can be opened. The entire cargo must then be delivered to the trade-men at the direction of the chiefs, on credit. The owner of the merchandize, therefore, must depend entirely upon the integrity of these people for a return cargo, and generally, if he is unprotected or the flag unknown, he must induce them to believe it for their ultimate interest to pay up well, or the voyage will turn out but a sorry one. This regulation has to this day almost entirely excluded American vessels from the most profitable points of trade. They cannot with safety entrust their cargo to those from whom they have no means of enforcing payment. But the ease is very different with the English trader. In most cases a regular treaty of commerce has been made between an officer of his government and the chiefs, and he lands his goods in accordance therewith, well knowing that in case of any great default or delay in re-payment, he has but to threaten them with a "man-of-war" and the balance is at once made up. H something in the way of treaty or purchase is not speedily done, we again repeat, that the commerce of that coast, at least the important part of it, will speedily be lost to the United States, and it is only a matter of astonishment to us that our vessels have not long ere this been excluded from the Delta of the Niger and other large rivers.

The second and most efficient mode of advancing our commercial interests in Africa and securing a permanent market for American produce, we have said is, by affording protection to, and cherishing the American colonies already established there. This we would urge both as a matter of policy on part of our government and of *justice* to the colonies themselves. The influence already exerted by these settlements upon American commerce has never been duly estimated. They have been the very foundation of a great part of the trade now carried on between this comtry and West Africa. If we look back to the interval of time between the cessation of the *carrying* trade of slaves, which was successfully and vigorously prosecuted by our northern merchantmen, and the establishment of the colony of Liberia, we find our commerce with the west coast of Africa dwindled to almost nothing. In fact the trade could hardly be said to have been resumed subsequent to the last war, until the founding of the Liberia colony. Until that period the coast of Guinea was unknown to American merchants, except as a slave mart.

The colony has been instrumental in forming and increasing our African commerce in various ways. First by publications made by the Colonization Society, giving valuable information with regard to the climate, the seasons, the productions of the soil and the demand for articles of American produce and manufacture. Then by chartering vessels for the transportation of emigrants, thereby giving the masters of such vessels, and through them the shipping merchants, an insight into the peculiarities of a trade with which they were before entirely unacquainted. It is a fact that more than two-thirds of the commerce between the United States and West Africa for the past twenty years arose from this one cause. Again, owing to the establishment of the colonies, the trade in their vicinity has been materially increased, produce has been concentrated in such a manner as to allow the merchant captain to transact his business in much less time and with comparatively less risk. The colony in fact places our African commerce on nearly the same footing as that of our northern with the southern states. It forms a port of entry for which our vessels clear, and where proper debenture certificates can be obtained for securing drawback. It furnishes a depot for any surplus cargo or such as may not find a ready market. In case of wreck or danger from the seas, or stress of weather, it either furnishes the means of repair and relitting, or an asylum for mariners until they can be returned to their homes. But more than all, it affords a place of refuge and recovery in the too frequent cases of disease which affect whole crews of vessels imprudently trading in the pestilential rivers of the coast. We have again and again seen vessels in the harbor of Monrovia brought down from the malarious rivers of the windward coast with not one of their original crews on board able to perform duty. In many instances we have seen them restored to comparative health and enabled to complete their voyage; in others new crews have been shipped from the colonists to navigate the vessel to the United States. In either case the vessel and cargo were saved entirely by the existence of the colony of Liberia. The fact is well known to all acquainted with the West Coast of Africa, that the fives of many American mariners and thousands of dollars worth of American merchandize have been saved through the instrumentality of these colonies; that through them and them only, has American commerce been fostered and protected on the coast. We say therefore, that it is not only a matter of interest and policy, but of duty-of justice, that the American government should through the agency of her squadron and otherwise, afford them all constitutional aid and support.

But can it be believed that with a knowledge of all these facts, (for they have been before the public for the past ten years) with a knowledge that these same colonies have been planted on the very ground of the old slave barricoons, and that these same American colonists have actually destroyed by force of arms several large slave factories and liberated some hundreds of slaves, abolished the very existence of slavery within their territory; yea, done more to suppress the slave-trade than any one Christian civilized power save England—we say, can it be believed, that where so much has been done through the individual philanthropy of American citizens—the American government should to this late period fail to take any cognizance of these colonies whatever? Yea, what is worse, that when she is forced by circumstances to maintain a squadron on that very coast for the suppression of the slave-trade, that a foreign port far remote from the seenes of the traffic should be selected as a rendezvous for her squadron and a depot for their provisions? Hitherto the colonists have but considered themselves neglected—they have felt that causes have existed which at least could be alleged with plausibility, for the inter neglect with which they have been treated, and under all circumstances tending to alienate their affections from America and the American people, still they have honorably maintained a kind of allegiance to our government and the kindliest feelings for the land of their birth. But it cannot be hoped that with the policy at present pursued by our government with regard to them, this state of things can long continue. If they are to be set at naught and considered of no account in matters wherein they have already effected so much—if they are to be considered as unfit for a rendezyous for an American squadron, or even as a depot for marine stores—if their parent government refuses to them the incidental aid and advantage arising from such an arrangement, then we predict that ere long they will prefer to seek a paternity equally advantageous and honorable to themselves, and one too which will be most readily granted.

But independent of any claims of the colonies upon the protection and patronage of our government, we are unable to conceive the policy or expediency of establishing the rendezvous of our squadron at the Cape de Verds, or of cruising among the Canaries and Maderia, if the object of the African squadron is either the suppression of the slave trade or the protection and advancement of American commerce on the coast of Africa. Granting the letter of the treaty is to be fulfilled in good faith, and that the squadron of eighty guns is to assist to its utmost in the suppression of the slave trade, then certainly the first object would be to select a place of rendezvous as near as possible to the scene of action, and which should at the same time possess the requisite qualities of healthiness of location, good anchorage ground and facility for procuring good water and fresh provisions. As St. Jago was selected in preference to the American colonies, it must be supposed to possess one or more of these qualities, in a greater degree than either Monrovia or Cape Palmas. But the case is far otherwise. In the dry season we grant, the Cape de Verds are considered to be more salubrious than the colonies, but in the rainy season, we believe that it is conceded that they are all equally unhealthy with any part of the coast. With regard to harbour or anchorage ground the preference must be given to any open roadstead on the coast to Port au Praya. In the rainy season the whole region of the Cape de Verds is noted for

squalls and foul weather, and the swell rolling into the harbour of Port au Praya from the south is so tremendons, that no vessel can at times ride with safety. On the other hand, well-manned and well-rigged vessels can, at all times and seasons, lay at anchor at any distance from the shore on the African coast in from six to twenty fathoms water, and generally in muddy bottom, without the least risk of parting their cables. As to facilities for procuring fresh provisions and vegetables, the barren Cape de Verds, affording only a browsing for goats, and whose inhabitants are supplied with nearly all their breadstuff from foreign vessels, probably next to the coast of Zahara afford the least of any port in the world. While the American colonies, particularly that of Cape Palmas, would well suply those articles so important for the preservation of the health of the crews of cruisers on a long voyage. Here are to be found goats, sheep, bullocks and fowls in abundance, also, the fruits and vegetables peculiar to tropical climates, as rice, banannas, plantains, sweet potatoes and the like in any desirable quantities. Independently, therefore, of all claims of the colonies to such incidental advantages as might arise from making them the rendezvous for our squadron, we conceive the interests of the government, the welfare of the squadron, and the very success of the enterprise imperatively require it. The immediate vicinity of the colonies is the very ground on which the squadron is required to act. At twelve hours sail from Liberia bay is the greatest slave mart on the windward coast, whence it is computed that from five to ten thousand slaves are shipped annually; and the nearer to such points the rendezvous is established and the depot fixed, the more advantageously will the objects of the squadron be accomplished.

There never was a more suicidal measure than this aparantly intentional neglect of the Africo-American colonies by our government. What could not have been done by the government itself, namely, the purchase of territory and the planting of foreign colonies to advance our commercial interests, has been projected and accomplished by individual philanthropy. What could not have been effected by white citizens of the United States has been executed by her freed colored population, pilgrims of the nineteenth century, seeking that liberty in their ancestral land which was denied them in the new world. Here our government finds ready at hand the very establishment which a sagacious statesman would have desired. a key of that vast continent to unlock and open its treasures to our commerce, a foothold from which, with the least possible protection, we could not be dislodged. We have thus far realized all the advantages of colonial possessions without the expense of founding or supporting them. We have the material for extending and perpetuating colonies on the coast of Africa not possessed by any other nation in the world; and why should all these advantages be sacrificed? Why should we not, at least, seek to retain what we already possess, when it can so easily be done? Above all, let it not be said that we refuse the incidental aid which our squadron would necessarily afford by making these colonies the centre of its operations.

RECEIPTS OF THE AMERICAN COLONIZATION SOCIETY, FROM 1st JANUARY, TO 21th JANUARY, 1841.
